Lodestone Voting

- **Description:** The goal is to build certain modules for a website that helps people vote intelligently in political elections. The concept for the website is that "no one knows everything about every candidate, but everyone knows something about some candidates." Based on this reality, Contributors, who are Users that are interested in politics, endorse and oppose candidates. Voters, who are Users who merely want to vote intelligently, are then matched with like-minded Contributors, where the matching is determined based on answers to a short Questionnaire. Sample Ballots are then created for each Voter recommending the Candidate who received a majority of matching Contributor's endorsements.
- **Team Size:** 1
- **URL:** <https://www.lodestonevoting.com/>
