

Respected ma'am/sir,

As an avid enthusiast of the fields of GIS and geography, I write to you expressing my interest for the position of GIS intern at your esteemed institution. As a fresher who is yet to experience the world of GIS and pursue it further, I hope to gain a lot from this opportunity.

The internship requirements align well with my area of experience and interest. As a part of my capstone project for the university of Toronto, with my mentor Mr. Don Boyes, I created a detailed spatial analysis of the Ghazipur landfill in Delhi using various spatial analysis tools. Not just this, I used my skills learned from Mr. Boyes to perform various spatial analysis projects on different topics involving both raster and vector datasets. I also recently conducted an extensive survey on the urban waste management problems, with Delhi as my focus region. I am well equipped with using various statistical tools used for survey and research. Apart from this, I have thorough knowledge of urban geography. Moreover, my curriculum at university of Delhi, requires me to be extensively proficient in the discipline of GIS.

- Well-equipped in using Microsoft excel and power point
- Proficiency in use of ArcGIS desktop, ArcGIS online, ArcGIS server and Quantum GIS.
- Experience in handling geospatial data and using various spatial analysis tools (proximity, 3-D analysis, raster analysis, overlay, Boolean operations, model builder, map algebra, interpolation tools etc.
- Knowledge of handling open-source data (google earth, BHUVAN, USGS, openstreetmaps etc.)

As a CBSE geography topper, attaining a perfect score in the discipline, I am well dedicated to any institution I associate with. As a hardworking student, I assure that my dedication towards this field would be really helpful to my supervisors.

Kindly review my resume and review my portfolio representing my research projects and GIS projects.

Thank you for your consideration

Sincerely,

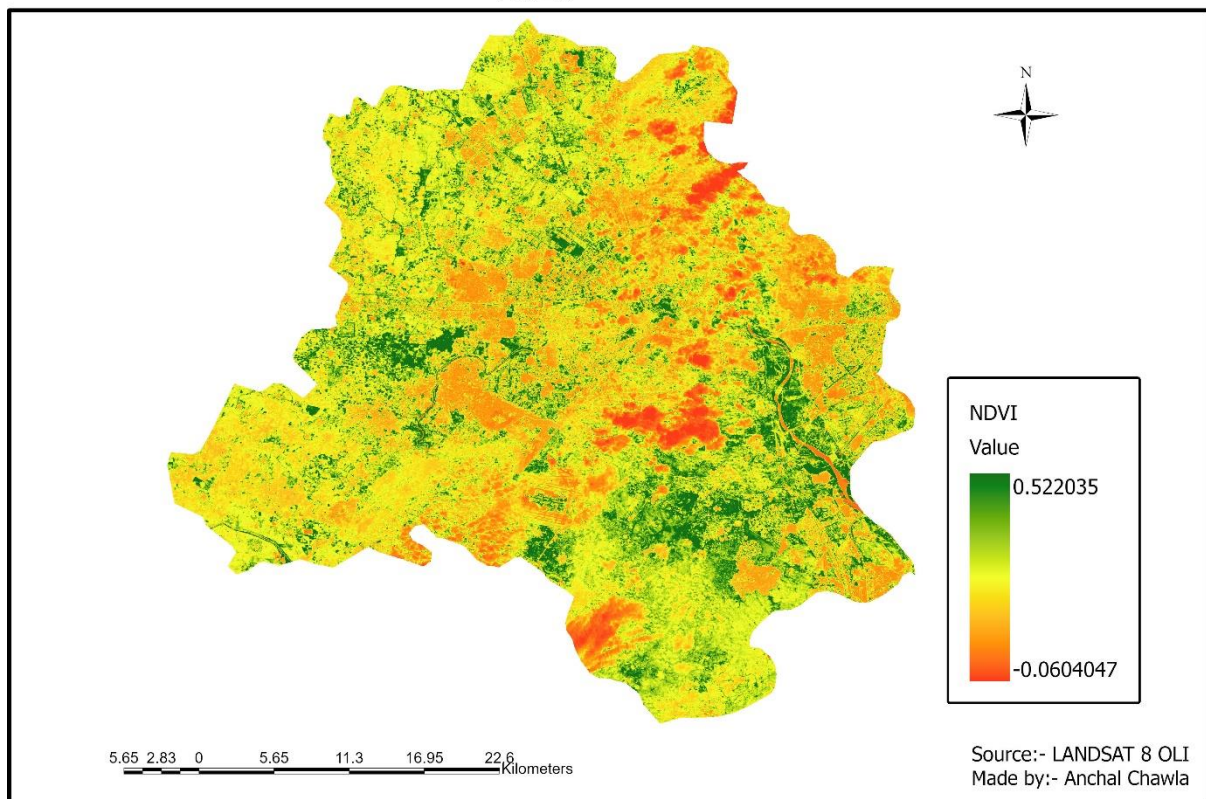

Anchal Chawla
