EXPERIENCE

2 Year of Experience in developing WEB application using PHP, JAVASCRIPT, MY SQL, LARAVEL, CAKEPHP, Codigniter, Having Good analytical skills and a quick learner.

Currently working as a php developer in a company named Hestabit Pvt Ltd. I am working one project (psydro.com).my responsibility is to develop backend, manage all team code on git ,live code and making Api's.

PROJECT 'S

1. <https://www.psydro.com/>

Project Description:

Psydro is a review sharing website with star rating where consumer and business registered.also it have Android and IOS application.

Responsibility:

my responsibility was to develop backend, manage all team code on git ,live code ,making Api's and manage all work with team .

2.<https://www.solidcoupon.com/>.**Project Description:**

Solidcoupon is an coupon and online shopping based website. It provide offers and deals from many online stores such as amazon, flipkart, snapdeal etc.

Responsibility:

In Solidcoupon.com my work was to make and update the backend system with new requirements. This backend system is responsible for rendering all the information about products, offers, coupons, cashback offers, advertisement etc. This backend system provide an form like interface where user can easily create products, coupons, offers and many things. Not only create user is also able to update existing product information and delete existing products.

The latest module in which i have worked was responsible for displaying products specification and information in a particular position order. This module provide an easy interface to user so that they can create products headings information very easily. Not only that user can arrange product's heading position so that heading will be displayed in a website in a particular position order.

3.<https://www.tutorialspine.com/>**Description:**

Tutorialplane.com provides IT tutorials like core Php, Codigniter, Laravel, Knockout js etc tutorials.

Responsibility:

Here my responsibility was to identifies code that is working properly or not and make Codeigniter tutorials and check what error occur inside that code.

4. <https://www.traveliciousholidays.in>**Description:**

Traveliciousholidays is a Indian tour booking website where user may book his tour in easy way where user send query through this website and company sales team contact to that user and book that tour.

Responsibility:

In **Traveliciousholidays**, my work was to make and update the backend system with new requirements and make to make packages to the user. Here admin create new hotel,s with price and render it on front-end.

So in sort thing, I make admin panel.

5. CRM of traveliciousholidays

Description:

This CRM work's in three different-different front-end like Admin, Manager and executive where admin and manage can see company growth from one place. Also admin assign work to manager and executive, and manager assign work to executive and comment, chatting them also.

Responsibility:

Here my responsibility was to create and update back-end with notification, chatting and comment system. According to employee destination here show different-different view like company growth graph, to-do-list, customer list and more.
