WORK

April 2021-present
Agami-Tech (Java Developer)

Modify existing software to correct errors, to adapt it to new hardware, or to upgrade interfaces and improve performance. Correct errors by making appropriate changes and rechecking the program to ensure that the desired results are produced. Developed application using Java/J2EE platform. Implemented the Model View Control (MVC) structure.

Implemented server side programs by using Servlet, JSP and JDBC.

Involved in creating basic SQL for CRUD operations and advanced SQL for procedures.

Created DAO classes to implement CRUD operations by using JDBC transactions.

Tasked with creating POJO classes as well as Login page server-side and client side validation.

Applied Object-Oriented Programming (OOP) principles by using Interface, Abstract, Overriding and Overloading.

Designed and developed very complex and large web pages using HTML, CSS, jQuery and Bootstrap for Dynamic web pages.

Worked on form validation, error handling and event handling using JavaScript and jQuery.

Used Advanced Core Java concepts of Collections, Generics, Multithreading, Synchronization for Design Patterns,

Develop UIs with JSP, JavaScript, HTML and CSS.

Created RESTful APIs for increased scalability of the application.

Projects

I have work on crm software . In this software my responsibility is to to fix bugs and upgrade project also. The project based on java which uses spring MVC with spring3 version, database is mySql, and JQuery and plan javaScript is also uses in this project. currently i m upgrading the project from spring 3 to spring 5 .
