## EXPERIENCE

NOVEMBER 2020 - PRESENT

### SCAN TO LEARN TECHNOLOGIES PVT LTD

#### SOFTWARE TEST ENGINEER

- **Multiple-Vendor Module:** Converts your existing store into a complete online shopping mall marketplace with multiple sellers. Using this extension, the suppliers/sellers can manage the product listings, inventory, orders, shipment, seller profile page, collection page, and much more. Suppliers/sellers can add multiple types of products - simple, configurable, virtual, and downloadable.
- **RMA Extension:** Using RMA (or Return Merchandise Authorization) System, the store owners will be able to manage product returns, exchange, refunds, order cancellation easily. With RMA Extension, the customers, as well as the guest users, can create an RMA request for returning the products or cancelling the order delivery.
- **Naukri Board :** Using the Naukri Board extension, the admin of the webstore can manage the job categories, jobs, and applications from the admin backend. The applicants have to browse the jobs from the frontend and can upload their resume along with the respective job application. Email Notifications are sent out to the admin and the customers.
- **OpenCart Marketplace Product Mass Upload:** Opencart Marketplace Product Mass Upload add-on is useful for bulk upload products. Using this Marketplace add-on Seller can upload the bulk products using CSV, XML, and XLS files. The admin/seller can also add data flow profile for database synchronization.
