 Ms Azure(Basics) C++

PROJECTS

Society Notebook.

Technologies used : Java , Ajax, JavaScript , jQuery , MySQL, Unix , Angular , HTML and CSS.

Framework used : Spring MVC.

Generally, in Society all the work is decided in meetings and maintenance bills, contact no of members are recorded on the papers. There is no automated system for doing all the things that generally happens in society, so that members can come to know what is happening in society. The Society Notebook allows members to login with their own account and get updated with society happenings. Society Notebook is the website portal to reduce conflicts among society members. The system has automated functionality for calculating monthly maintenance bill and member can view their bill status on their account.

Health Insurance

Technologies used : Java , MySQL , HTML and CSS.

Framework used : Spring MVC(J2EE).

Over the years they have used the traditional selling methods where company employees approach the potential clients and sell them the policies. User uses and maintain a Diary to put all these Personal and Policy Details. Personal Details may be maintain imperfectly. So to overcome on this issues we have developed highly security web application.

Salesforce

Technologies used : Java (APEX) , JavaScript , HTML and CSS, Unix.

I had the responsibility of creating brand new Visualforce Pages, as there are two different aspects in VF Pages 1.VF markup, 2.VF Container, I was with the 1st aspect which is VF markup i.e it consists of Visualforce tags, HTML, JavaScript, or any other Web-enabled code embedded within a single <apex:page> tag.
