DETAILS OF THE PROJECTS WORKED ON

1 **Project Name** Kraft Heinz CRM

Client Kraft Heinz

Description of the project

This project involves migrating, hosting and enhancing 200+ global Kraft Heinz brand websites leveraging Infosys' proprietary SKAVA ecommerce platform. It's a multi-year project during which Infosys will develop and operate the site, maintain product catalogues, handle partner integrations, implement and measure SEO, analytics and personalization strategy to increase e-commerce traffic and conversion.

Role : Technology Architect

Responsibility :

- Platform Ownership – Technically provide solution and guiding the team and technical delivery of Client engagement with **SKAVA eCommerce product's** modules like **Catalog, User, HippoCMS, Event Processor and List**.
- Provide Architectural design for product as well as solution related changes to be done for this engagement.

P. Babu

- Integrated **Google Firebase** for end user Login authentication functionality.
- Integrated the following front end 3rd party libraries like **Whisk, PriceSpider, Signal** for ecommerce and analytical user experiences.
- Infrastructure - Provide Architectural design for the modules for our Client's Canada engagement.
- Identify options that will address the solution requirements, create solution selection criteria, and assess alternative options
- Provide technical leadership and take responsibility for planning activities leading to the design and development of solutions, ensuring delivery teams have a clear vision and path.
- Produce the detailed solution designs and participate in all stages of a product development life cycle (development, testing and release to production).
- Produce solution designs for new applications and manage ongoing design updates for existing applications.
- Work closely with infrastructure teams, security engineers and other architects.
- Facilitate the evaluation and selection of hardware/software technologies. Analyze current solutions and identify opportunities for improvements and automation.
- Research/monitor relevance of technology developments and industry trends to the organization, and make recommendations to enhance productivity.
- Deliver work products in line with schedule commitments and implementation plans.
- Identify risks/issues and propose mitigation plans to remove barriers.
- Apply knowledge of Agile methods and participate in team activities, ceremonies and efforts to continuously improve processes (backlog development, grooming, and sprint planning and team retrospectives).
- Ensure technical artifacts are accurate, accessible, maintained and communicated.

Duration : Jan 2018 - Nov 2020

JB

2 **Project Name** Rewards System implementation for AIMIA

Client AIMIA

Description of the project

This project involves generating Rewards platform for the client. The platform should allow for different pricing and combination of multiple loyalty currencies plus cash (Points, Stars, Nights, Stays, Steps, Cashback, Miles and Cash) of the same SKU depending on clients. The proposed solution designed for AIMIA to handling multiple loyalty programs. AIMIA's customer will have

different loyalty currencies and PIM should support the different currencies.
