### **Summary:**

Seeking a professionally challenging and rewarding career by keeping abreast with the latest developments in Software Technology. Application developer with 4.9+ years of IT experience in design, development and implementation of large scalable Internet/ Intranet applications using **PHP, Opencart**.

### **Professional Skills:**

- **OpenCart**
- Knowledge of **PHP, MySQL, JavaScript, jQuery, Html, CSS, Bootstrap**
- WordPress, CodeIgniter, APIs

### **Organizational Experience:**

**Senior Software Engineer, Webkul Software Pvt Ltd, H-28 Sector 63, Noida | 23 April 2018 – Current**

### **Projects: -**

- **Wachabi Project:** - In this project I worked on more than 20 customized modules and customized the default OpenCart and also customized the theme as well. **Link:** <https://wachabi.com/es/>
- **Seller Group Project:** - In this I developed a module to design the t-shirt as per the seller need. Seller can upload logo and resize the logo and add to multiple variations with different colors. **Link:** <https://wall31.com/>
- **OpenCart Replace Add to Cart Module:** - Using this module admin can change the AddToCart button working. **Link:** <https://store.webkul.com/opencart-replace-add-to-cart.html>
- **Opencart Vehicle Part Finder:** - Using this module, the customers can search for parts on the online store. **Link:** <https://store.webkul.com/opencart-vehicle-part-finder.html>
- **Jaguar Imports Project:** - Customized module to update the shipping cost on the UPS database. **Link:-** <https://jaguarimports.com/>
- **OpenCart Geolocation Currency Converter Module:** - Customized module to block the checkout if the currency is not matching the current location currency. **Link:** <https://wall31.com/>
- **OpenCart Offermio Customization:** - Customized module to add the advertisement and show based on the category and location. **Link:-** <https://www.offermio.com/>
- **Opencart Multi-Vendor Marketplace:** - Marketplace module of Opencart is quite flexible in functionality and works out of the box. This module will convert your Opencart store into Marketplace. **Link:** <https://store.webkul.com/opencart-multi-vendor-marketplace.html>
- **OpenCart Hybrid Application:** - Using this module Admin can convert the online store to Android and IOS application without developing the native application. **Link:** <https://store.webkul.com/opencart-hybrid-mobile-app.html>

- **Opencart QuickBooks Desktop Connector:** - QuickBooks Desktop is a one-time purchase accounting software to be installed on your desktop computer. Considering the major advantages of QuickBooks desktop version, Webkul has integrated it with Opencart. **Link:** <https://store.webkul.com/OpenCart-QuickBooks-Desktop-Connector.html>
- **Opencart Marketplace USPS by Stamps:** - Opencart Marketplace USPS by Stamps.com facilitates to provide cost-effective and efficient shipping services to Opencart marketplace vendors. **Link:** <https://store.webkul.com/opencart-marketplace-usps-stamps-com.html>
- **Opencart DHgate Dropship Management:** - Using this plugin, the Opencart store owner can now import the products from DHgate webstore and then can list them within his webstore. **Link:** <https://store.webkul.com/opencart-dhgate-dropship-management.html>
- **Opencart Aliexpress Dropship Management Module:** - Using this module, the admin can import the products from the Aliexpress into the Opencart store and can start selling those products within their own store very easily. **Link:** <https://store.webkul.com/opencart-dropship.html>
- **Opencart Marketplace Multi Shipping:** - Opencart Marketplace Multi Shipping module enables the seller to allow Multi shipping method for buyers. **Link:** <https://store.webkul.com/Opencart-Marketplace-Multi-Shipping.html>
- **Opencart B2B Wholesale Catalogue for Vendors:** - With this module, the seller can now add the admin products and sell them as per their requirement. **Link:** <https://store.webkul.com/opencart-b2b-wholesale-vendor-catalogue.html>
- **OpenCart Security Suite:** - This module offers an extremely interesting 2factor Authentication feature for admin, customers, and affiliate user login, which requires a QR code scan using a Google authenticator application installed on the smartphones. **Link:** <https://store.webkul.com/opencart-security-extension.html>
- **Opencart Admin Buyer Chat:** - Opencart Admin Buyer Chat module establishes a real-time direct communication between admin and the buyers. **Link:** <https://store.webkul.com/Opencart-Admin-Buyer-Chat.html>
- **OpenCart Marketplace MOIP Payment Gateway:** - MOIP is an ideal payment solution for e-commerce, marketplaces, and many other places. **Link:** <https://store.webkul.com/Opencart-Marketplace-Moip-Payment.html>

Also, I worked on the many more Shipping and Payment modules and on multiple customizations and customized modules as well.

PHP Developer, iGaud Solutions Pvt Ltd, Dwarka Sector-7, New Delhi | June 8, 2016 - April 10, 2018

#### **WordPress Websites:**

- **Devsena Industries Pvt Ltd.** **Link :** [devsenaindustries.com](http://devsenaindustries.com)
- **Sunhyper Pvt Ltd.** **Link :** [sunhyper.in](http://sunhyper.in)
- **Foodgustos :** [foodgustos.com](http://foodgustos.com)
- **Kaira Homecare.** **Link :** <http://kairahomecare.com/>
- **Knowledge Sharing Trust(KSTIndia).** **Link :** <http://kstindia.org/>

#### **Internship:-**

**Infoseek Pvt. Ltd. Lucknow, U.P**

**Duration:** 6 month

**Platform:** PHP/MySQL

**Project :** Dynamic Dashboard

**Description:** All the contents of a web page access directly from the database. Contents like:-logo image, menu bar option, slider images, section content, footer content etc.

Which will be the last inserted id in a table the data of that row will be shown on the web page. If a user is authorized, he can change the web page content according to himself.

#### **Summer Training Experience:**

**DUCAT, Noida**

##### **Vehicle Information System**

J2EE based online portal for registration of all vehicle and parts purchased.

Workshop and police section are special features of this portal. Here the user can add up the new vehicle details who want to make insurance to their vehicle. First the user have to login. There are 2 types of users, Admin and employee. Here admin have some more rights than employee. If any vehicle wanted to enroll for insurance, then the vehicle details have to be entered, provided with the owners detail and Admin automatically has the permission to update and delete the records. The main part of this project is police section.

#### **In-house Project:-**

##### **Online Payment Billing System**

The main objective while implementing the project on Telephone Billing System was to minimize the work load and increase the speed of the work done. To reduce manual work, improving work efficiency, saving time and to provide greater flexibility and user-friendliness.

#### **Academic Projects Undertaken:**

##### **Network Security using Honeypot system**

A honeypot is a computer system. There are files and directories. Directories in it are just like a real computer. However, the aim of the computer is to attract hackers to fall into it to watch and follow their behavior. So we can define it as a fake system which looks like a real system. Honeypots can capture attacks and give information about the attack type and if needed, thanks to the logs, it is possible to see additional information about the attack.

**Education:****Bachelors of Technology.**

Birla Institute of Applied Sciences (Computer Science) **2015**  
Uttarakhand Technical University

**Xii (10+2)**

G.I.C Sailanigoth (Uttarakhand Board) **2011**

**X (10th)**

V.V.Mandir (Uttarakhand Board) **2009**

**Other Accomplishments:**
