### UI/UX Designer

I'm a User Experience (UX) / User Interface Designer . I love to work together with software and design firms, communicating application design principles and strategies for ongoing development.

My aim is to create better interfaces and experiences for the user, making the web, application's and technology easier for the user. Simplifying communication barriers by bridging the gap between end-users, designers and developers.

Looking forward to work with an Organization where I will get a chance to Showcase my Skills and would also contribute to the Growth of the Organization . As I am very Focused and Passionate about my Work , I believe that these are some qualities which an Organization would expect and also are helpful for Personal Growth.
