Nalanda Mahila College, (12<sup>th</sup>, PCM)- 68%

High School, (10th)- 55%

## Project Undertaken-

- Description:

One fundamental issue in today On-line Social Networks(OSNs) is to give users the ability to control the messages posted on their own private space to avoid that unwanted dcontentis displayed.Uptonow OSN sprovide little support to this requirement.To fill the gap,in this paper,we propose as ystemallowingOSN users to have adirect control on the messages posted on their walls.This is achieved through a flexiblerule- based system, that allows users to customize the filtering criteria to be applied to theirwalls, and a Machine-Learning based soft classifier automatically labeling messages in support of content based filtering.
