

Vishant Bhat

Programming is my face

OBJECTIVE

I want to explore each and every day. Skill is always my hunger and challenges keep me living. Innovation is a key to my path. So all I want is to find an environment where I can see these factors or if not I like an environment where I can create the same.

EXPERIENCE

Deputy Manager- IT, Centum Learning LTD - New Delhi

New Delhi — September 2018-Present

I am working in Centum Learning as Deputy Manager IT. The roles which I perform in the organization are

- Web Application Development
- Mobile Application Development
- Software Application Support

Senior Software / Web Developer, Christabel Anderson IT Solution

Jammu, J & K — 2015-2018

It has been always great to work under the projects in the company. It's always some different platform I have always worked and as they say programming is always about thinking. So different types of platforms I have added to my programming and to my skill set.

Accomplishments

- From junior developer to Team Leader in 4 months
- Delivered more than 100 projects in 2016-17 year
- Made generic platform for doing audits in automated way for the **Tatasky** client in 2 months only
- Made generic platform for doing audits in automated way for the **Airtel** client in 2 months only.

Projects

Some of the best projects I have done are:

- **Tata Sky (September 2018-November 2018):** This application is web and mobile integrated. This application has 4 user levels that are super admin, MIS, Project Manager and Auditor. the audit details are extracted from Excel. Every user maintains its own space. the audit forms are created dynamically for the auditors and the audits are done by the auditor by android app where he uploads the images and answers for the audit forms. This app also traces your location of the auditor. Technologies used are Core PHP, Codeigniter, MySQL, JQuery, Android
- **Airtel Beat App (September 2018-November 2018):** this application is web and mobile integrated. This application has 4 user levels that are super admin, MIS, Project Manager and Trainer. the promoters details are extracted from Excel. Every user maintains its own space. the training forms are created dynamically for the trainers and the audits are done by the trainer by android app where he uploads the images, videos and answers for the audit forms. This app also traces your location of the auditor. Technologies used are Core PHP, Codeigniter, MySQL, JQuery, Android
- **Intello Care(March 2016-July 2016):** This project is a web application in which we have carers and clients. The application assigns the carer intellectually to client. So all the validations are done dynamically by the application. Admin can generate the monthly, yearly rotas for both client and carer. The platform used is php,mysql,jquery. The application is fully developed by me.
- **Birmingham council(December 2015- February 2016):** This project is a web application. In this user registers himself for new business proposal. He has a login and has to fill the different sections. The admin can view all the users, can accept or reject them. Admin also gives the comment on every section. The platform used is php, mysql, jquery. javascript. The application is fully developed by me.
- **Leaflet Tracker(March 2016-February 2017):** This is a tracking application. The latitude and longitude of a user from mobile are send to the server where it is stored. The admin can track them from web application online. The admin can see where the person started and end. The platform used is android, IOS, php, mysql, jquery, javascript. The application is fully developed by me.
- **Leaflet Management System(March 2017-April 2017):** This is a management system for leaflets. In this application the projects are created by the admin and also the admin created the campaign. The admin adds the client for which the leaflets are to be distributed. The admin then makes the project for every client and assigns the leaflets for project. The admin then created the different campaign and every campaign can have number of projects in which the leaflets will be distributed . The platform used is php, mysql, jquery, javascript. The application is fully developed by me.
- **Gadget Word Shop(March 2018-Mach 2018):** This is a e-commerce project selling the gadgets. This project is made in magento integrated with paypal.
- **Connect2Deals(June 2016-June 2016):** This is a e-commerce project selling the accessories, luggage bags and hardware projects. This project is made in magento integrated with paypal.
- **Resume Maker(Feb 2016-March 2016):** This was a login based application. In this application the user has to submit the details as per the different categories and can add up the details dynamically in the application. The user selects the type of resume he wants from the different designs. Then the user has to pay the bill and resume gets generated for him in the same manner. Its is made in FPDF Library integrated with paypal and mysql.
- **Viva Management app(July 2016-Aug 2016):** This web application is made in Java spring, maven and hibernates integrated with the My Sql. The application has two users. One for the teacher and other for the student. The teacher can create the viva tests for different subjects of categories with date and time. The teacher can give the remarks and feedback to the viva of student. The student can book the viva for any slot and check the results and also can generate the report card.
- **Image Editor (Aug 2016- Aug2016):** This is an application made in Java Script. It edits every image and also applies ever kind of filter to the image. It was completed in 10 days.
