WORK EXPERIENCE

ORACLE FINANCIAL SOFTWARE SERVICES.(OFSS)	<i>APPLICATION DEVELOPER</i>	FEB '11- AUG '12
FLEXCEL INTERNATIONAL PVT LTD.	<i>ASSOCIATED CONSULTANT</i>	SEP '10-FEB'11

Retail Banking Product : New Generation Product (NGP)

Releases : R2A Release (CASA Module, TD Module)

R2B Release (LOAN Module, CASA Enhancement, TD Enhancement)

Next generation product is integration of the diverse functionalities of its existing suite of core banking system products. This next generation product is built around a modular architecture, where each module would manage the functionalities required in the different business areas like Origination, CASA. Term deposit etc

NGP is a product which caters all the banking related applications under one roof.

I have worked on different modules in NGP , Term Deposits, CASA, Pricing, Origination, PMU and Loans in product testing perspective.

Responsibilities:

- Worked from early stages of Testing i.e. FS Review
- Took initiative for whole Unit Testing of Term Deposit module i.e. Testing units for services and screen painting
- Worked on Integration Testing , testing screens ,services and related functions after integrating different units on system
- Worked on System Testing to test overall system functionality
- Error Reporting, monitoring their progress, bug fix verification
- Designed all possible Practical Bank test scenarios for Term Deposit Module testing and the same has been executed by whole TD testing Team.
- Preparing Day 0 Setups (Setup the products to test functionality based on Requirement Specifications)
Product parameter setup, interest rule setup, interest payout plan setup, Pricing Setup

- Database testing (testing fields updation in related tables in database after performing transactions on system)
- Identified gaps between Technical Design and Functional Specification
- Testing Batch Processing of Transactions (Transactions processed in EOD/BOD)
- Execution of Testplans

Team Size: 50

Technologies Used: JAVA , Oracle 11g

FLEXCEL INTERNATIONAL PVT LTD.	<i>ASSOCIATED CONSULTANT</i>	MAY'08 - AUG'10
---------------------------------------	------------------------------	------------------------

i-Flex Product : Flexcube Retail (Loan module)

Project Description: Oracle FLEXCUBE Private Banking helps banks, financial institutions, and other wealth management service providers deliver self directed and advisor-driven solutions to their customers. Also it is a comprehensive, customer-centric solution that offers a wealth management portal, a customer interaction tool, and portfolio management capabilities – all which can be integrated with your core banking solutions.

Responsibilities:

- Worked on project(client's web application & functionality) testing as well as product (Flexcube) testing.
- Error Reporting, monitoring their progress, bug fix verification.
- Analyzing customer requirements & documenting Test Cases.
- UI & functional testing for client's web application & flexcube, database testing (i.e. connection of client's web application & flexcube databases as well as flexcube database.
- Document preparation for tested UI & functionality with screenshots & proper explanation

Demand Manager (Web based Product)

i2 TECNOLOGIES PVT. LTD, Mumbai

Project Description: The Demand Manager product is i2's demand planning solution designed specifically to support a Collaborative, Continuous Demand Management process. The solution combines best of breed statistical forecasting techniques, rule-based modeling, event-based planning, and real-time data

synchronization, with easy-to-use multi-dimensional analysis capabilities. Demand Manager is built on a web-based architecture and industry standard databases that provide superior usability, performance and scalability. In addition to traditional demand planning processes, Demand Manager has comprehensive support for the latest best practice Continuous Demand Management.

Responsibilities:

- Testing of various modules
- Error Reporting, monitoring their progress, bug fix verification using Bug Tracking System
- Documenting Test Cases
- Testing software, patches and working with application servers like WebSphere and Weblogic. Worked on installation & configuration of WebLogic & Websphere UI servers
- Creation of XML files according to test cases & usage of that created XML files for batch testing on UNIX & windows platform
- Creation of Forrester Setups for testing purpose
- Customer Patches Testing includes Tar Verification, Issue Verification, Automation and Impact Area Testing
- Locale testing including creation of locale setups i.e. Japanese/Chinese setups & sanity testing of created locale setup
- Product (Demand Manager) Version Upgrade & Database Upgrade Testing

Team Size: 6

Technologies Used: JAVA ,Oracle 11g

Summary of other Projects

July 2004 to Oct 2004 – Worked as a **Web Developer** for the CHINTAN SYSTEMS PVT. LTD, Mumbai on project “Learn On” developed for **SIMENS**. SIEMENS is uses “Demand Manager” product. Any new employee joins the company, he/she should understand “Demand Manager” product quickly and easily. For this purpose we had created a web application which was fulfilling all the requirements of SIEMENS. The project was developed using ZOPE 2.7.2 environment with LINUX, Python, JavaScript, SQL, PL/SQL, HTML, DTML

Nov 2003 to June 2004 – Worked as a **Web Developer** for the CHINTAN SYSTEMS PVT. LTD, Mumbai on project “Diabetes Center” developed for **Diabetes Doctor**. This project has been developed for maintaining various information about diabetic patients, medicines, tests and accordingly generating various reports for patients. The project was developed using ZOPE 2.7.2 environment with LINUX, Python, JavaScript, SQL, PL/SQL, HTML, DTML
