Project

Project Title: Law And Order Automation System

Description: This is a web based application which provides better interaction between the public and Police officers. The crime is the major concern of every citizen and police officers therefore there must be any solution provided to them for the better processing of the system. The proposed system helps the officers and citizens to control the further crime. Maintaining the criminal information state wise, city wise or area wise so that there will be proper record of the crimes. To develop a Law and order automation system to assist in the management of criminal records and ease/or control the process of making the records of crimes as well as criminals.
