WORK EXPERIENCE

GlobalLogic Pvt. Ltd.

Pearson - Digital Education Experience

07/2018 - Present

Achievements/Tasks

- Building a learning platform (microservice-based-platform) on which an instructor can publish its book and any student who has access can read the contents of that book.
- Also, the instructor can create courses and assignments onto the books. And, the students, who have access, can subscribe to these courses and can attempt these assignments. Instructors can track the progress of each student on the platform itself.
- Responsibility:**
- Developed the REST APIs through which the instructors can provision the contents of that book. The APIs are written in Java8 along with Spring Boot and persist data into the Couchbase (A NoSQL database).
- Implement the asynchronous inter-services communication through the Kafka messaging queue.
- Implement the scheduled jobs to perform some background tasks.
- Writing code that incorporates the SONAR standards and also writing the JUnits.
- Debugging Production and Lower Environments issue with the help of tracing tools like Grafana and Kibana.
