SUMMARY

- Passionate over 4 month experience in **Java**(Spring) and 8 months in **Android**
- Strong knowledge on designing and implementation of REST Web services
- Should be efficient with Java J2EE and related technologies.
- Strong in developing with Spring MVC framework and Spring Boot
- Proficient in MySQL and complex relational database design
- Good developing effective APIs, RESTful Web services for internal and external consumption
- Will design, build, and maintain efficient, reusable, and reliable Java code in order to drive strong user information solutions
- Good knowledge of Relational Databases, SQL, and ORM technologies (JPA2, Hibernate)
- Familiar with Angular version 8+
- Build reusable code and libraries for future use
- Collaborate with cross-functional teams to define, design, and ship new features.
- building dynamic and reusable components with Angular

EDUCATION

C.Z.M Gosrani BCA Collage | B.C.A in Computer | 58/100

July 2016 – May 2019

Coursework: Object-Oriented Design and Programming, Web Programming, Software Engineering, Knowledge Discovery, Data Structures, and Computer Networks

TECHNICAL SKILLS

- **Middleware Packages:** JBoss/JBoss EAP, Tomcat, Apache, WebLogic
- **Web Technologies:** Spring Boot, Spring MVC, Hibernate, Servlets, JSP, Struts, SOAP and Restful Web Services, Applets, Java Swing, Java Beans, JMS, HTML, JavaScript, J Query, XML
- **Databases:** MySQL, Firebase Real Time Database, SQLite
- **Tools & Technologies:** Atlassian Jira, Android Studio, Eclipse, JSP, Hibernate, JPA,REST, Distributed Systems, Object Oriented development, Linux, Web Services, Relational database systems
- **Version Control (CI/CD Tools):** GIT, GitHub

PROJECTS

Online Logistics Management System

Software Engineering Intern, Java

- Developed a vehicle booking website for transportation of goods using Java, JSP, HTML, CSS, JavaScript, and MySQL.
- Designed the whole website according to client's requirements alone starting from scratch.

- Added functionality to upload goods details for client and bids for the transporter.
- Based on the transporters bid, the client can select them to transport their goods.

WORK EXPERIENCE

Consurgen (Banglore, India)

Sep 2021 – Till Now

Full Stack Developer(Java Developer)

-Java Backend

- Work on Project Requisition Material of Jsw Steel Build Backend in Java and Frontend in Angular.
- This App for selecting a batch plant for Supply Material to Users(Contractor) of Jsw Steel.
- Client generates requests like Material Requisition requests, SOS Material Requisition.
- Request will be rejected and Approved by batch plant employees.
- functionality added for employees can give permission for approve the request to new user and client, approve and reject requests, create new user, create service, dispatch the material and assign batch plant to other companies.
- functionality added for User will see the view request of daily History and future User, Create MR and SOS MR Request and also Approve the request if have permission given.
- Employee can generate the report schedule time(daily, weekly and monthly) to get the report in the mail.
- Employee can approve the MR, SOS MR request when the permission is given otherwise it will be approved by Project Incharge.

-Angular

- Create dispatch Screen Employee generates dispatches, return dispatches and delete dispatches.
- Create Schedule Time Popup for employees to get Reports in the mail.
