❖ PROJECT 01

Name : CIBIC.
Client : Canadian Imperial Bank of Commerce, Canada.
Domain : Investment Banking.
Roles : Functional Testing, Non-functional Testing and Database Testing.

Project Description:

CIBC's wholesale banking business works with domestic and international organizations looking for a banking relationship that combines in-depth industry knowledge with comprehensive capital markets, corporate banking and investment banking capabilities to address their most pressing needs. We strive to forge strong and deep relationships with our clients to understand the demands of their business and bring distinctive and appropriate solutions to the table.

Organizations looking to expand, diversify or restructure their operations know they can rely on us for in-depth advice, market-leading M&A experience and extensive capital-raising services to help them meet their business needs. CIBC bring together the deep resources of a global investment bank to tailor a set of solutions that address your short- and long-term strategic and financial objectives. We can arrange financing for equities and equity-linked securities, including initial public offerings, follow-on equity issues, convertible issues, preferred shares and private placements. In addition, CIBC have extensive expertise in originating public debt offerings, medium-term notes, private placements and structured notes. You can also gain ready access to a range of lending products to finance your ongoing activities and capitalize on market opportunities.

Roles and Responsibilities:

- Requirement Analysis: Understanding the requirements and communicating with BA team for better understanding of the requirements.
- Responsible for testing deliverables, prioritizes and monitors activities to meet such dates for individual assigned features.
- Identified End to End Test Scenarios, Test Cases and Test Data.
- Writing effective and optimized Test Cases.
- Execution of test cases.
- Identification of defects, registering them in JIRA and reporting them to the onsite lead.
- Performing Functional Testing, Regression Testing and Re-Testing.
- Performing additional system testing related activities, as assigned.
- Active participation in weekly/daily status calls.
