### ✓ **Objective**

I m highly passionate about back-end aspects of software development and being into it since a while, having great exposure in Django,python,Relational Databases,integrating with front end components, and in creating Restful APIs, I love to challenge my knowledge about my domain on daily basis in depth and keeps working on exciting and complex projects for the same cause I think I m a great fit for this role

### ✓ **Education**

#### **Guru Gobind Singh Indraprasth University**

Bachelor in Computer Applications/2022

### ✓ **Skills**

Python

Django

Javascript

REST APIs

C++

Bootstrap

Postgres

### ✓ **Projects**

#### **Content management system**

Here I created CMS,with an admin and author's panel,for creating updating and deleting of posts, also assigned different permissions to author and admin along with fully backed authentication system

#### **Shareable Quiz WebApp**

I created a Quiz webapp which can be used in statistical and behavioural surveys and later to be analysed using Matplotlib

Using Bootstrap for Front jQuery,ajax and efficient queries

#### **E commerce website**

I applied every feature of a modern E commerce website from Email Authentication, dashboard for admin,ability to add different categories of products,with optimised database schema and queries using postgres as db, also ability to add to cart for Anonymous users with online payment intergration

#### **Content Aggregator/News Website**

I used Scrapy for scrapping different news websites, integrated it in Django project, did SMS Authentication and Webhooks for updates from an external database
