EXPERIENCE

Colan Infotech Pvt Ltd — Software Engineer

Feb 2021 - Till

Here I work on service-based projects and my role is to support solving bugs and handling the full projects and managing websites. I want to learn more while working on every project. I faced the new experience of the drone project to fly with the help of government permission using NPNT and use some third-party APIs.

Poorvika Mobiles Pvt Ltd — Programmer

Feb 2020 - Sep 2020

I worked on the eCommerce website to add and update product information on the poorvika websites, fix bugs, manage EMI offers, update customer reviews, notify product information, and handle APIs.

6Univers — Web Developer

April 2018 - February 2020

My role is to develop websites and web applications and to support moving forward to the company in the software industry and manage management activities and digital marketing activities. I handle every project single-hand under pressure.

- Be responsible to maintain company activities
- Lead the team
- Determining user needs by analyzing technical requirements
- Optimize the websites maximum speed and scalability
- Deploy the client requirements with their satisfaction

VMR IT SOLUTIONS — Web Developer

June 2017 - Dec 2017

My role is to support the development of websites and web applications. I started my career in this company, this is a startup company based on services. I had learned to start my own work experience, quick learning, and passion for coding. The company gave me both experience and internship also to move forward with my career.

TOP PROJECTS

Drone

To develop this application is used to fly on air with the permission of the government portal DGCA and NPNT. We are mainly focused on customized firmware to fly drones with RC controllers. Like Pixhawk drones it is an open-source platform and manages stores, the collection of drones and sales to the customers and remote pilots. Here I also use some third-party libraries to fly drones. The APIs are,

- Pixhawk Open source
- DGCA & NPNT
- Mapbox
- Wowza Live Streaming
- Airmap
- DSC

Integrity Marketing

It is an American company that manages our company products. It is an insurance-based company and maintains the users, agents, customers, and report details. The products are,

- Agent Portal
- Lead Management System
- CRM
- Agent System
- Marketing Incentives
- Automation

Tuteediary

To develop this application is used in every school and College. It provides all kinds of applications in a single project and it improves student performance and boosts extra activities.

- Collect Fee
- Attendance
- Marks Report
- Extracurricular Activities
- Feedback
- ID Card System & Events etc...
- RFID
- Rating System
