EDUCATION

BE - 2015

Shree L.R.Tiwari College of
Engineering

PROFESSIONAL EXPERIENCE

IDC Technologies .

March 2020 - Till Present

- Working as Oracle Database Administrator.
- Proactively Monitoring the OEM 13c tool.
- Taking action on capacity alerts like Tablespace, archive area, mount point alerts.
- OEM agent configuration.
- Agent related vulnerability fixing
- Daily Database report configuration, its pointer change.
- Extraction of Baseline check phase report.
- Decommissioned of agents.
- Providing sync status of database
- Resolving issues if dr is not in sync with prod by taking incremental backup
- Taking Export level backup (expdp) and Import level backup (impdp)
- Fetching AWR and ADDM reports related to Performance tuning from OEM (Oracle Enterprise Manager).
- DR drill activities.
- Patching.

Netstar Solutions Pvt.Ltd.

Oct 2018 – Feb 2020

- Working as Oracle Database Administrator.
- Monitoring performance metrics, total Database size, tablespace growth.
- Installing and upgrading the database software
- Perform daily activities of Database Administrator.
- Index Rebuilding and Update Stats.
- Created Cron jobs for Physical and logical backup.
- Monitored the Database, Rman Backup, Awr reports of database analyzing related to performance tuning, Data pump for **Newaco Grupo Lda(Africa)**.

- Implementation of Dataguard for **KRISFLEXIPACKS (Thane)** client.
- Cross Platform Database Migration (using Datapump concept) for KVIC (VileParle) client.
- Analyzing AWR and ADDM reports related to Performancetuning from OEM (Oracle Enterprise Manager).

Lumina Datamatics. (Multinational e Commerce Service Provider Company)

Aug 2015 – Oct 2018

- To provide Information management solution to the International Customer.
- To enhance the Productivity of leading organization documents intensive process through intelligent automation –Smart Document Processing.
- This includes tools like Arbortext, Document, Link maker, Intelliconnect.
- Client Interaction with US based Customers for any clarification, problem resolution.
- Update CMS Documentum using client instruction and Tools.
- Occupational Safety and Health Administration (OSHA) Project, DDUS, Pclr News Watch, Database handling of the clients, Tools Used: Arbortext, documentum, citrix, Link maker, Osha tool for **Wolters Kluwer(USA)**.

SKILLS & CERTIFICATION

Oracle Database 11g SQL fundamentals I

- Retrieving data using the SQL SELECT statement.
- Restricting and Sorting data.(WHERE and ORDER BY clause)
- Using Single-Row functions to customize output.
- Using Conversion functions and Conditional expressions.
- Reporting aggregated data using the group function.
- Displaying data from multiple tables.
- Using the Setoperators.
- Using Subqueries to Solve Queries.
- Manipulating Data (Insert, update, delete, control transactions).
- Using DDL statements to create and manage tables.
- Creating other schema objects (views, sequences, indexes and synonyms).

Oracle 11g Database Administration

- Exploring the Oracle Database Architecture.
- Installing Oracle Software (**GUI and Silent**).
- Creating an Oracle Database (**using DBCA both GUI and Silent**).
- Managing the Oracle Database Instance (**startup and shutdown stages**).
- Redo Log management. (**Adding/Dropping Redolog members/groups**).
- Administering User Security
 - Database user creation/management.
 - Implementing profiles.
- Backup and Recovery.
 - Flashback database, drop, query and table.
 - Configure ARCHIVELOG mode.
- Managing Database Storage Structures /Files
 - Actions with Table space like create/drop/offline/online
 - Adding/Resizing Data files
 - Renaming/Relocating Datafile
 - Space Management in Tablespace.
- Undo Management (undo retention and undo advisor).
- Configuring the Oracle Network Environment
 - Use Netca and Netmgr to create and configure the listener (start and stop the listener)
 - Use tnsping to test Oracle Net connectivity.
- Database Recovery Using RMAN
 - Recover from loss of a spfile file using RMAN
 - Recover from loss of a control file using RMAN
 - Recover from loss of a datafile using RMAN
 - Restoring Archived Redo Log files.
 - Full Database Restore and Recover using RMAN
 - Real Time Scenarios like DB cloning using RMAN Backup.
 - Incomplete /Point-in-time recovery using RMAN

Performance Tuning

- Session Management and Statistics Management.
- Index Creation and index rebuilding.
- Checking Locks/Dead Locks/Blocking sessions.
- Wait events and long running queries.
- Generating Statspack/AWR/ASH/ADDM Reports.

OTHER INFORMATION & INTEREST

- Travelling to different places
- Listening to contemporary Hindi music
- Language proficiency- English, Hindi and Marathi

STATEMENT OF PURPOSE

I understand that success is neither a coincidence nor an accident; it is a commitment. The competitive & diverse environment, ample scope for individual, vertical growth, multifaceted job profiles, travelling across geographies, rapid career progression made me strive for a career in Information Technology sector.

My studies in Engineering, Corporate experience and my passion to perform, have all helped me build and develop my problem solving skills and ability for creative thought.

I also possess the quest for excellence, thoroughness, quality verbal/written skills, social competence and adaptability that help translate ideas into results.

I bring with me a strong skill set of conceptual and analytical capabilities combines with team building and interpersonal skills.

Looking forward for a challenging opportunity with your organization.
