ABOUT ME

As the fittest residents of Planet Earth, I believe humans have a responsibility for the well-being of their fellow beings and the planet. I believe every life has the right to not just survive but thrive and those with advantage should support those without. However, this is not quite the way things are and therefore, there is work to be done.

Professionally, I am an web designer & developer and graphic designer with more than 2 years of freelancing experience. I create interesting works of art, I conceptualise and design. I am passionate about photography. I do photo documentations, photo stories and art photography. Photo Stories interests me most.

On earlier days i used to do hand paintings and sketches but after i was introduced to Computer generated graphics i tried to consume as much i can.

I love to keep myself updated with the most newest designing softwares out there still there is a long way to go i believe.

If my expertise and services can be of use to you, I am available for both part and full time opportunities. You know how to contact me.
