HCL Technologies – NOIDA

Technical Lead

Client : - NCR Corporation, US

(Nov 2008 – Jul 2012)

ESXi | VMWare vCenter | Hyper-V | High Availability | HPE – DL/BL Servers | DELL Servers | Tape Library | Patch Management | DMZ | NetBackup | OS Troubleshooting | sysinternals | BSOD – Dump Analysis

Even though was only hired to be a “Wintel” expert, I went above and beyond the call of duty and surpassed everyone’s expectations by gradually learning and performing roles such as VMware administrator, Database Administrator, OS (Operating System) Engineer, Application & Web Server Specialist, Server Hardware Engineer. I had the burning desire to provide value and make an invaluable impact on the entire product, which I successfully did. My invaluable contributions were not only recognized by our client *NCR Corporation*, but was also awarded with “Award of Achievement for All Round Performance” by HCL itself.

AccelFrontline Limited: New Delhi

Team Lead/Sr Engineer

Clients: - Aricent Technologies (Gurgaon) / Lufthansa Airlines (New Delhi)

(Jun 2005 – Oct 2008)

WSUS | Backup | PowerShell | WDS | Active Directory | Server-Client | Antivirus | Windows OS | RBAC | Patching

In the early days, there were no pre-defined automation tools to perform the system administration tasks easily. Customer/IT engineering were using the manual approach for *deployment of server, clients, agents, binaries, configurations, etc.* I started a centralized automated approach for OS deployment by using *Windows Deployment Services (WDS)*, *automated the configuration deployment with batch and PowerShell scripts*. This approach also helped a lot while working on *WSUS, Backup, antivirus, application support, Role based access control (RBAC) implementation, Global account management activities*. I was able to increase the efficiency of the team with quicker response to the customer needs.
