Some of my recent projects are:

a) <https://www.steadfastnutrition.in/>

b) <https://www.healingworld.co.in/>

c) <https://www.orco.co.in/>

etc

1)Project 1: Brainers.in (LMS with lots of other functionalities)

URL: <https://www.brainers.in> Team Size: 3

Project Completion: One and half month

Framework: CodeIgniter

Functionalities:

a) Login and Registration

b) CCAvenue Payment Gateway Integration

c) Live Chat Integration

d) SMS Gateway Integration

e) Video Player extension integration (plyr.js)

f) User Profile with account edit/change password/profile pic and study his purchased courses.

g) Admin Panel With all the controls and filters.(create category and subcategory and courses under it, courses with its different sections and lessons)

h) Created REST API to get linked with iclstore

i) Responsive and SEO based website with updating metas keyword/descriptions and title, embedded Gtag, Facebook pixel and event code, schemas, created sitemap.xml and robots.txt. etc

j) Many more.

2)Project 2: World Blockchain organization

URL: <http://www.worldblockchainorganisation.com>

Team size for the project: 3-4

Project Completion time: 25-30 days

Roles and functionalities:

I have created User Interface in wordpress DIVI 3.0

Login panels for different level of users (such as experts, members, admin etc) are designed by front end developer.

The backend is created for all level of users in Core PHP

The different level of users has different access level which again is controlled by admin.

3) Project 3: ST Andrews College's Website

URL: <http://saitmgurgaon.com/> (in core php)

Team size for the project: 3

Project Completion time: 25-30 days

Roles and Function:

The UI is designed by the UI developer by taking reference from different website given by client.

I have created admin panel with strong Content Management System (CMS).

Integrated Live Chat and other 3rd parties API.

The project is completely developed using OOPS concept.

4)Project 4: Vegokart App (API)

Team size for the project: 3-4

Project Completion time: 30-35 days

Roles and Functions:

I have created backend and API to handle the android App.

Incorporation with android developer, json parsing is done.

Vegokart is small online store App for vegetables.

5) Project 5: Healing World

URL: <https://www.healingworld.co.in/>(in wordpress & woocommerce)

Team Size for the project: 2

Project completion time: 30 days

Roles and Function:

The each module and rows of the website is designed by using DIVI 3.0 .(This task is performed by me)

I have configured all the YITH and woocommerce plugins and extensions.

Integration of Payment Gateway as: Paypal, PayUMoney, CCAvenue, Instamojo. Etc

SMS Gateway Integration.

Live Chat Integration.
