- |          |              |           |                   |
|----------|--------------|-----------|-------------------|
| ■ Python | ■ Web2py     | ■ ReactJs | ■ Materialize css |
| ■ PHP    | ■ Wordpress  | ■ Laravel | ■ Bootstrap css   |
| ■ MySQL  | ■ JavaScript | ■ CSS     | ■ HTML 5          |
| ■ JQuery | ■ Rest API's |           |                   |

## Professional Experience:

Organization : Shoes On Loose Pvt Ltd, Green park, New Delhi  
Designation : Software Engineer  
Period : Jan 2018 to till date

## Key Result Areas:

- Responsible for developing codes as required.

- Continuous meeting and finding the scope of improvement of the products owned.
- Responsible for managing the team.

### **Highlights:**

- Implemented process enhancement initiatives by proactively developing scripts that reduced the turnaround time of the process and increased productivity for the company.
- Created CRM for Trip Sales Management using web2py, ReactJS and MySQL.

### **Projects:**

**Title** : Pre Sales Manager  
**Technology** : Python, Web2py, Rest API, HTML, Javascript, Mysql,CSS  
**Duration** : 6 months

#### **Description:**

Pre sales managers suggest and help sales executives to quickly create quotations as per the client requirement and send it to clients through the system.

#### **Responsibilities:**

- Design E-R Diagram.
- Developed backend api for getting the recommended package for the lead.
- Integrated third party API.
- Developed user-facing frontend component which helps sales executives to easily interact with the system.

**Title** : Lead Management System  
**Technology** : Python, Web2py, Rest API, HTML, React JS, Mysql,CSS  
**Duration** : 3 months

#### **Description:**

Lead Management System is responsible for gathering leads from a number of different third-party sources. and identify the market qualified lead and sales qualified lead in a funnel and assign a score to them. which helps sales executives to decide in which they should take followup on a priority basis.

#### **Responsibilities:**

- Implemented a reminder system which helps sales executives to keep reminding about the lead when certain events or criteria meet, in which they have to take followup.
- Created React based front end components for the user interface.

**Title** : Post Sales CRM  
**Technology** : Python, Web2py, Rest API, HTML, Javascript, Mysql,CSS  
**Duration** : 6 months

#### **Description:**

Post Sales CRM is developed with the aim of increasing the efficiency of operation executives and increasing the number of bookings while keeping the manpower constant.

**Responsibilities:**

- Develop backend API and automate the process of sending a reminder to clients for the payment.
- The most important feature of this project is to hassle-free the work of the operation team. So we have also developed an API for solving most of the problems of operation by analyzing previous booking data.

**Title** : Analysis Dashboard

**Technology** : React Js, Python, Chart js, web2py

**Duration** : 6 months

**Description:**

This project is to help management teams to make data-driven decisions. We measure almost everything which can help to build a project better, but to use those data was quite not possible without this dashboard. Different data needs different visual representations and filtering those data according to certain criteria was quite challenging prior.

**Responsibilities:**

- Design E-R Diagram.
- Develop a reusable and highly manageable react component to dynamically add a chart or filter as per the requirement using the front end only.
- It provides data and graphs to analyze and get insights into the data.
- Registration based architecture helps any developer to register their API and type of chart to show it in the dashboard.

**Title** : KYC and VISA Processor

**Technology** : Python, Web2py, JavaScript, JQuery

**Duration** : 1 months

**Description:**

This project is to help the travellers to upload their documents, which are cross checked by the operation team and then shared to the vendor for VISA processing. After processing the VISA vendor can upload the VISA and the user can download it.

**Responsibilities:**

- Design E-R Diagram.
- Design the UI.
- Develop the code.

**Title** : Site Optimization and Page Speed

**Technology** : Python, Web2py, HTML5, JavaScript

**Duration** : 20 days

**Description:**

This Project improves page load time of the website to improve SEO ranking of the website.

**Responsibilities:**

- Optimize server side (Python) codes.
- Create codes for minimisation of the response html page, JavaScript and CSS .
- It provides data and graphs to analyze and get insights into the data.

Learnings: Python, Web2py, ReactJS, Material Design.

**Organization** : SDLC Labs Technologies Pvt Ltd, Gurgaon  
**Designation** : Software Engineer  
**Period** : July 2016 to Dec 2017

**Key Result Areas:**

- Responsible for developing codes as required.
- Optimize the web application.
- Develop wordpress plugins and themes.

**Highlights:**

- Created CRM for Event ticket booking using PHP, Laravel, JQuery and MySQL.
- Setup and customised 20+ websites using wordpress.

**Projects:**

**Title** : Event Manager  
**Technology** : PHP, Laravel, Rest API's, HTML, Javascript, Mysql, Bootstrap CSS  
**Duration** : 6 months

**Description:**

Event manager helps vendors to quickly add events, available seats for the event and costing, and the admin can publish the events through the system.

**Responsibilities:**

- Design E-R Diagram.
- Developed backend for vendors to manage events and admin panel.
- Integrated PayPal Payment gateway.
- Developed a user-facing frontend component to easily interact with the system.

**Title** : eCommerce for ticket sales  
**Technology** : PHP, Wordpress, Rest API, HTML, Mysql, CSS  
**Duration** : 3 months

**Description:**

This Application is responsible for describing and event, sale tickets, payment processing, cancel tickets and refund processing.

**Responsibilities:**

- Customise a wordpress theme as per requirements.
- Customise and setup woocommerce plugin.
- Integrate PayPal Payment gateway.

**Title** : Setup and customise Websites  
**Technology** : PHP, Wordpress, Rest API, HTML, Javascript, Mysql, CSS  
**Duration** : 9 months

**Description:**

Setup and customise and optimize 20+ websites using wordpress CMS, JQuery etc.

**Responsibilities:**

- Server setup and install wordpress
- Customize themes and plugins.

**Learnings:** Angular, Ionic Framework, Google Firebase.

**Organization** : Osho Net, Begusarai
