## PROJECTS UNDERTAKEN:

### M. Tech. Project –

- Project - **A Reconciling Website System to Enhance Efficiency with Web Mining Techniques.**  
(Front End- Java JDK 1.7, Netbeans 7.1.1)

### Project Description:

The title of my project is '**A Reconciling Website System to Enhance Efficiency with Web Mining Techniques.**' which is based on JAVA. Our approach presents a wide-ranging overview of web mining methods and techniques used for the evaluation of reconciling systems to attain better web navigation efficiency with the intention of improving the efficiency of web site. Project is to provide Recommendation for the developer which is based on user Browsing patterns. It concatenates and coordinates among different reasons for making recommendations including frequency of access, and patterns of access by user to the web site. It is new way to increase the efficiency of web site system using web mining techniques.
