(November 2016-Nov 2019)

Chattary Ajwan InfoTech Pvt. LTD AHMEDABAD
Software developer and Implementer
HRMS Department
(Nov 2019 to still working)

Projects:

EHRMS :

Tools and Technologies- ASP.Net 4.0 with C#, Sql server 2014.

Platform : Platform dependent.

Roles & Responsibility: Coding, Design,Implement ,Support.

Project Description. This is a business Marketing Product .

- The client is a thin-client which runs on window 10. It shares a common code base for both the platforms.
- The client server setup is service oriented, based on ASP.NET services (Dot Net on Window 10).

GoodWill Industries:

Tools and Technologies- ASP.Net 4.0 with C#, Sql server 2008.

Platform : Platform dependent.

Roles & Responsibility: Coding, Design.

Project Description. This is a business Marketing Product .

- The client is a thin-client which runs on both Windows and Macintosh (OS X). It shares a common code base for both the platforms.
- This has multiple clients, Mac/Windows and support for working with Quark Express and Adobe In Design. The client server setup is service oriented, based on ASP.NET services (Dot Net on Window xp).

Sahkari Samiti web application .

Tools and Technologies- ASP.Net 4.0 with C#, Sql server 2008

Platform : Platform dependent.

Roles & Responsibility: Coding, Design.

Project Description: : he new Web application project type does not replace the Web site project type

To inform for the requirement of payment installment at the various stages of construction work at a particular house.

- Instead, it is an alternative project type that you might choose depending on your requirements and your preferred development workflow .
- Some developers will find the default Visual Studio 2010 Web site project model natural and easy to use. Other developers will prefer a model in which project resources are defined explicitly (rather than implicitly by simply being in a folder) and in which they have tighter control over their project, and will therefore choose the new Web application project model.
- Rather than forcing developers to use just one project model, we will support both project models and allow developers to choose whichever Web project model works best for them.

Surendra Construction Real Estate Company Project

Tools and Technologies: ASP.Net 4.0 with C#, Sql server 2008

Roles & Responsibility: Coding and Design

Details: To keep the record of clients booking in our real estate projects, To inform company for the requirement of payment installment at the various stages of construction work at a particular house.
