Ø **Previously I was in Software End To End Solutions Pvt. Ltd.** as associate Software Engineer .

Ø Training in .Net from “**Nares Technologies (Software Training & Development) An ISO 9001:2000 Certified Company**” Hyderabad

TECHNICAL SKILLS

- **Languages-** C#, Linq, HTML, CSS
- **Technologies-** Asp.Net, Mvc, Web Api, ADO.NET, AJAX, JQuery.
- **Databases-** SQL Server 2012, SQL Server 2008 R2.
- **Platforms-** Microsoft .NET Framework v4.0, 4.5, IIS 5.0 or Later.
- **Tools-** Visual Studio 2017, Visual Studio 2013, Visual Studio 2012, SQL Server 2012, SQL Server 2008 R2, AJAX control toolkit, Entity Framework ,Web Api.
- **Other Packages -** MS Office 2007/2010.

- **Pattern & Designs** – N-Tier Architecture. Web Api
- Familiar with Methodologies like OOPS and Software Development Life Cycle (SDLC).

PROFESSIONAL PROJECT PROFILE

Current Project : SOMAX

Client : **SOMAX (USA)**

Duration : Running

Tools Used : Asp.Net c#, Ms Sql server, Linq, Web Api, Bootstrap, Ajax, J-query, CSS

Role& Team Size : Leading Programmer with a team of 10 members.

Description:

SOMAX makes it easy to track the maintenance of physical assets throughout each life cycle, and get visibility into valuable details about work history and maintenance. This is useful for operations of all sizes, from tracking a few assets in a single location to tracking a magnitude of assets across locations in multi-site enterprises.

Project #1 : NTOOITIVE HIVE

Client : **NTOOITIVE (USA)**

Duration : 1 YEAR

Tools Used : Asp.Net c#, Ms Sql server, Linq, Web Api, Bootstrap, Ajax, J-query, CSS

Role& Team Size : Leading Programmer with a team of 8 members.

Description:

Ntooitive takes your traditional sense of a digital advertising and marketing agency a few steps further. This one of the e-commerce software used for Advertising agency. The main work is taking the advertising order and generate purchase order. After approval assign this order to the internal user. This user can gather all the requirement against the order from client and start the process work as required. Hear admin can create multiple user and assign different work to different user. and user can update status to client. Lastly user can generate the I/O file which is nothing but the billing file. and send it to client. Hear Admin can check various reports like all Active Order, Running Order, Completed Order and all bill related reports etc.

<u>Project #2</u>	: ACCOUNT MANAGEMENT SYSTEM
Duration	: 8 month
No of Module	: Super Admin, Accountant, user
Involved In	: Accountant, User
Database	: Sql Server 2012
Role &Team Size	: Programmer with a team of 3 members
Environment	: C#, Asp.Net, ADO.Net, Asp.Net Ajax, Json, JQuery

Project Description: The goal of the project is to maintain all activities of Accounting System. The main Police is to maintain account. This is basically college based software. Throw this software we can able to manage all the heads and what amount collected over which head and what is the current status of heads. We can collect Admission Re Admission and Form fill-up collection over students. Here we can maintain CASH BOOK with Opening and Closing Balance. Supper Admin can able to see all the DCR (Daley Collection Report) date wise, all the transferred amount, all the credited amount, all the debited amount with single or multiple date wise.

Roles and Responsibilities:

- Understanding of Software Requirement Specification coming from Project management team.
- Involved in design prototype for Super Admin.
- Involved in Coding with C# and Asp.Net.
- Using ADO.Net for retrieving/manipulating data from Database (SQL Server)

Project #3: VISITO (VISITOR MANAGEMENT SYSTEM)

Duration	: Nearly 6 month
Role &Team Size	: Programmer with 1 members
Environment	: C#, ASP.Net, SQL Server 2012, HTML, JavaScript.

Description: This is nothing but a visitor management system. When a visitor will come, Security will fill all details of visitor with the contact person name (i.e whom To Meet). At the mean time contact person will get **SMS Alert** as well as **Mail** from the security with the link side by side and also on the system screen a popup will appear that 'One Person Is waiting For You'. When contact person will approve that person security will print the **Visitor Gate Pass** and allow the visitor to entry the gate.

The key components

- Customer Relationship Management
- SMS Alert
- Email Alert
- Popup Alert On the screen
- Visitor Pass Design

The application is designed on three-tier architecture, segregated into Presentation layer, business logic layer and Data Access Layer. The main focus of this approach is to abstract out

different activities and there by gaining ability to change the presentation layer without affecting the business layer and vice versa.

Responsibilities:

- Requirement Analysis
- Coding and Testing C#, ASP.Net
- Writing SQL Server Stored Procedures, Triggers, Cursors and Functions
- Validating Database design
- Involving in Feature Enhancements

Project #4 :EXAM AUTOMATION SYSTEM

Client : MPC AUTONOMUS COLLEGE

Duration : 1 year

Tools Used : Asp.Net, Ms Sql server, Ajax, J-query, CSS

Role& Team Size : Leading Programmer with a team of 6 members.

Description:

In Exam Automation System We can register student details. Exam roll no will generated by software. Here we will assign subject against student. Generate the code for subject against student. Generate Mark Foil and Print Mark Foil. Print Hall Ticket for Exam. Entry mark against the student with single and double check because of security purpose and for avoid the wrong entry. We can entry Grace according to the criteria of college. Print the Grade sheet. According to the secured mark Improvement Selection will be there. Maintain TR (TABULATION REGISTER) Semester wise. Lastly we will select TOPPER LIST throw this software. Various reports are there to see the data quickly.

Main security feature is 3-tier architecture along with MSSQL server DB.

Project #5 : PAY-ROLL MANAGEMENT SYSTEM

Client : SEESPL

Duration : 3 MONTHS

Tools Used : Asp.Net MVC, Ms Sql server, Linq, Web Api, Bootstrap, Ajax, J-query, CSS

Role& Team Size : Leading Programmer with a team of 2 members.

Description:

Pay-Roll Management System is basically used to maintain the employee details like his/her personal details and salary details. With this software we can calculate the total earning and deduction salary of an individual. We can maintain the leave details also as this is required to calculate the loss of pay date. One thing is also there i.e If any employee taking any advance loan from the office then the installment amount also calculated with this software. Finally we can print the month wise salary slip.

Project #6 : LIBRARY MANAGEMENT SYSTEM

Client : **VARIOUS EDUCATIONAL INSTITUTE**

Duration : 3 MONTHS

Tools Used : Asp.Net c#, Ms Sql server, Linq, Web Api, Bootstrap, Ajax, J-query, CSS

Role & Team Size : Leading Programmer with a team of 4 members.

Description:

Library Management System basically used to maintain the activities of librarian. Here we can store book details with all room, self and rack wise. Store student and staff details also for issue and reissue of books. Here we can calculate the fine also using the software. This software is developed using all the features of library science like Cataloging, Circulation, Acquisition etc. Third party tools integrations also implemented for SMS and Email sending.

Currently I am studying and started working with a small internal project using angular js7 and Dot net core.

EDUCATION

- Completed my Bachelor of Technology (B.Tech) from Biju Patnaik University of Technology, Odisha, India in 2014 with 7.1 CGPA.
- Completed my +2 in board of CHSE in 2010 with 49 percentage.
- Completed my 10th in board of HSE in 2008 with 64 percentage.

PERSONAL PROFILE: Results-driven, articulate and analytical Software Engineer who can think “out of the box”. Strong in design and integration related problem solving skills. Skill set Expert in Microsoft technology, requirements specifications, user documentation and architectural systems research.
