1.	2 yrs. 6months	J2EE	Telecom	SSE	IGATE

**MAJOR ASSIGNMENTS:**

IRIS: Jun 2019 – till present	
Project Domain	Banking
Client	US
Environment	Spring, Java, PLSQL, Linux
Role	Senior Technical Consultant
Work Location	Noida

### Brief description of the project:

#### Reason of Development:

Client needed one software for money laundering. So this software got created which helps in detecting any money laundering happened in bank.

About project: AML: money laundering , ASM : scenario management

### Modules:

- ? Data Profiling
- ? Data Standardisation
- ? Data Quality
- ? Reconciliation

### Responsible for:

- ? Bug fixing and implementing new features in current modules.

#### Sopra: Oct 2016 – 31-May 2019

Project Domain	Ecommerce
Client	Multicountry
Environment	Hybris, Spring, Java, Hibernate, Linux
Role	Senior Software Engineer
Work Location	Noida

#### Sopra: Feb 2017 – Mar 2017

Project Domain	Ecommerce
Client	Multicountry
Environment	Hybris, Spring, Java, Hibernate, Linux
Role	Software Engineer
WORK LOCATION (ONSITE)	MILAN, ITALY

### Brief description of the project:

#### Reason of Development:

Got new project to support Gucci client, which moved from rubyonrail to Hybris-Java. In Italy worked with onshore team on hybris and learnt the basics of technology, domain and the project.

#### About project:

#### Modules:

- Backend: WCMS, HMC, HAC, ProductCockpit, Backoffice etc.
- Frontend.

#### Responsible for:

- Support of Backend.
- Sometimes for Front-end changes.

#### Sopra: July 2016 – Oct. 2016

Project Domain	Banking product (EID - Belgium)
Client	European clients
Environment	JSF, Java Security, Spring, Ibatis, Hibernate, Linux
Role	Software Engineer
<b>WORK LOCATION (ONSITE)</b>	<b>BRUSSELS, BELGIUM</b>

#### Brief description of the project:

##### Reason of Development:

Browsers stop supporting “Netscape Plugin Application Programming Interface” (NPAPI) architecture, because of which Java-applet is no more working. And EID- Belgium was implemented in JAVA-Applet. So requirement was to develop EID again in JavaScript with java backend.

##### About project:

Belgium people is having EID(electronic -id) card , which contains all personal information of an individual. EID was basically java – security project having three major modules:

#### Modules:

- Authentication
- Identification
- Signature

#### Responsible for:

- Development of Identification module at backend side(JAVA).
- Involved in many R&Ds, required during the project development.
- Technology: Java Security.

#### Sopra: Oct 2015 – June 2016

Project Domain	Banking product
Client	Swiss client
Environment	JSF, Java, Spring, Servlet, Hibernate, Linux
Role	Software Engineer
Work Location	Noida

**Brief description of the project:**

**Modules:**

- Working with Isolation framework team of the project.

**Responsible for:**

- Resolving patches on daily basis.
- Scope of the patches: GUI and Backend both.
- Technology: JSF.

**IGATE: Aug'2013 – 21<sup>st</sup> Oct 2015**

Project Domain	Telecom
Client	Orange
Environment	Java, Spring, JSP, Servlet, Web services, Ibatis, Hibernate, Java Play framework, Linux
Role	Senior Software Engineer
Work Location	Noida

**Brief description of the project:**

Telecom product having various modules. Few modules in which I was involved are follows :

**Modules:**

- Server
- Client
- SOA-Integration, USSD application
- Play application (Imenu)
- IDMP application

**Responsible for:**

- Involved in Change requests of SOA-Integration
- Involved in Change requests of Imenu.
- Change requests includes local deployments, development, testing.
- Developing Prototype and pseudo code
- Involved in Deployments of the modules in local environment.

**Achievements:**

-- 500 Points on hackersrank for JAVA.  
-- Got Appreciation award in IRIS for August-2019 month.  
--Got PAT On the Back Award(POB) with comments :  
For his commitment and dedication towards handling the Orange application support and for successful exposition of business services for SOA integration release for the month of May-14
