IMPORTANT PROJECT DETAILS

Project: UNICA (APIs)

Platform: PHP

Detail: This is IOS and Android App of UNICA. Worked on APIs and MySQL. JSON Data format is used.

Project: Agent CRM

Url: <https://www.uniagentscrm.com/>

Platform: Core PHP

Detail: Complete database design and PHP coding independently. It is an online office management system for Agents and their branches. It has six logins under main super admin. This software is mainly for those agents who deal students to send abroad for study and manage his application online. It has well developed system and authorization of all login levels.

Project: Video Player Website

Url: <http://www.crookstube.com/>

Platform: Code igniter

Detail: Complete database design and PHP coding of frontend and backend done by me. It is like youtube.com to watch videos of criminals doing crime in USA only. It has AJAX pagination and advanced searching. Anyone can upload the video of crimes after becoming a member of this site by filling the sing up form. Video will appear on the site after super Admin's approval. It has also MUGSHOT GAME but only registered users can play this game. This project has own video player not any embed link of youtube.com and supported in all handheld devices like Android phone, Tablet and smart phones.

Project: Website of Searching International institutes & Agents

Url: <https://www.uniagents.com/>

Platform: Core PHP Based on OOPs

Detail: It is a website based on OOPs. This website is used by international institutes, agents and students.

Project: bbunlock.com, unlock2go.com

Url: <http://unlockbberry.com/>, <http://www.bbunlock.com/>, <http://www.unlock2go.com/>,

Platform: Core PHP

Detail: These websites are for unlocking the phone for US. Integrating Paypal and customer's feedback.

Willing to relocate: Anywhere
