    DataBase Used - Firebase database
    ,Shared Preference

    API Type - Firebase database
    integration

    Environment Used- Linux, Android Studio

2.Project Name —IRadioLive.*(Worked with team)*

    Link-https://play.google.com/store/apps/details?id=stream.iradiolive&hl=en

    Features Did - Google + Login,FaceBook Login,Google Analytics,Push notification,Media Player integration, list view .
    API Type - POST,GET (JSON format)

    DataBase Used - SQLite

    Environment Used- Windows,Linux

3.Project Name —PreFix.*(Worked with team)*

    Link-https://play.google.com/store/apps/details?id=com.GlooFish.PreFIXPH&hl=en

    DataBase Used - SQLite

    Environment Used- Windows,
    Linux

    API Type - POST,GET (JSON format)

4.Project Name —Swasth UP.*(Worked with team)*

Link-https://play.google.com/store/apps/details?id=swasthup.iradiolive&hl=en_US

Features Did - Google + Login,FaceBook Login,Google Analytics,Push notification,Media Player integration, list view .

DataBase Used - SQLite

Environment Used- Windows,
Linux

API Type - POST,GET (JSON format)

SKILS

- Android Application Development
- UI Design
- Training & Development
- API integration
- Code Optimization
- App Publication on Google Play Store
- Unit Testing
- Error debugging
- Manual Testing
- Test sheet designing
- VCS(GIT using)
- Various things of android development
- Crashlytics using and apk distribution to tester by using crashlytics.
- POST man using for api response check
- PHP beginner

COMPANY WORK ACHIEVEMENTS AND AWARDS

- Monitoring and examining each stage of development.
- Coordinated between client requirement and development technology to make the product as per requirements.
