WORK EXPERIENCE

Software Engineer
Proactive Data Systems

09/2019 - Present   *Delhi, India*

Projects

- Worked on developing backend for a dashboard which can be used to show network alerts, usage analytics of clients, client details. This enables our customers to optimise their business and ease their functioning.
- Worked on the backend of the collaboration monitoring web application of the company. Which can be used for meetings analytics of the users on Cisco WebEx.
- Worked on automating the OS upgrading for the switches in the whole network of an organization for the EN Team, which was done manually and takes a lot of time. Now the time for configuring the switches is done in much lesser time with lesser amount of effort.
- Integrated API to create the incidents of the customers with D365 when any issue occurs in the network of any organization or if any device faliure occurs, which was earlier done manually. Reduced the complexity of the process and imporved the ease of business.
- Worked on developing a dashboard which can be used manage the license of the users within their organization. This dashboard enables them to manage the license of the users which are deactivated or not in the organization anymore.
- Worked with the frontend to ensure a seamless development process.
- Handled end users issues and fixed bugs on a daily basis in the currently running applications.
