Summary

Dedicated, ambitious and capable professional exploring opportunities in Information And Technology with a liking for Software technologies and related projects. Recognized for attention to detail and a strong work ethic.Well-versed in numerous programming languages including Angular,Ionic 5 Framework ,HTML5,Java,C++,JavaScript,CSS,MySQL.

Skill Highlights

- Java,Javascript
- Ionic 5 Framework
- C#,.net
- Nodejs
- Angular
- Database
- SQL,Postgress

Education

**Diploma In Advance Computing   2019-2020
CDAC Mumbai**
Relevant Courses
- Software engineering
- Database Technologies
- Web Development
- Cloud Computing
- Application Development
- UI/UX Designing

**Bachelor Of Engineering (Civil)   2012 – 2016
Pune University**
Relevant Courses
- Fundamental programming Languages
- Systems Approach
- Quantity Surveying
- Project Management

Certifications

CDAC   (Certificate)
National Service Scheme (NSS)

Computer Literacy

Microsoft Powerpoint

⬤⬤⬤⬤⬤⬤⬤⚪⚪⚪

Microsoft Excel

⬤⬤⬤⬤⬤⚪⚪⚪⚪⚪

Extra Curriculars

- 1st prize in Bridge making National Level event Force.
- Successfully completed training program on Contracts and Tenders.
- Coordinator in NSS
- Long distance runner

Other Information

Date of birth- Sept 8,1994
Residence - Dhule(Maharashtra)
Relocation availability – Yes

Internships and Experience

3i-Infotech   **(Oct 2020- Till Date)**

- Worked on a Universal Banking Project in which I have developed Screens which can provide great UI features and coordinate with the postgress database.
- Application Involves CRUD,Microservices,Kafka,UI features.

Technologies Used-

- Javascript,Visual studio,JAVA,postgress Database,Ionic 5 Framework,Angularjs (Version 9),JPA.

Bill-Easy Software solutions

- Worked on a project in which I have developed an API for getting employee details as an output.

Technologies Used-

- Javascript,Visual studio,Nodejs,postgress Database, Postman(to check an API)

Academic Projects

Material and Resource Planning System (J2EE)
Nov 2019 to Feb 2020
The MRP system accepts the sales and order with the quantity of products required by the customer. It then calculates the resources and raw materials required for manufacturing the products that are available and gives an exact requirement of deficit resources and helps to plan the manufacturing process. It stores the details of resources and orders in database and can be used to constantly update the quantities eliminating the need for any manual system. Application incorporated as part of system in the organisation.

Analysis of Water Supply Scheme By Using EPANET Software.
June2015 to March 2016
Conceptualized and designed the water supply scheme for a village in Nashik by using Microsoft based EPANET Software. In this software we put the lengths of the pipes,height of water tank and capacity of the water tank.It then calculates the diameter of pipes,the exact amount of pressure created by the water at the joints thereby saving the cost and time required for the project.
