Professional Experience

> **Project Name:** Degreed (Oct 2020 to cont.)
> **Client:** Degreed, US/EU/CA
> **Tool and Environment:** JIRA, Zephyr Scale, Feature Branch, Staging, Release, US-Beta, EU-Beta, EU Prod, US Prod, CA Prod
> **Roles** – Manual Testing

Project Details:

- Degreed was established in 2012 in San Francisco, CA
- Degreed is a LXP(Learning Experience Platform) system which integrates multiple LMS(Learning Management System) into their system to help the user get access of all the files relevant to their Skill Search. These files can be in form of Articles, Books, Podcasts, Videos etc
- In degreed, a user can also create pathway for learning step-by-step
- Degreed integrates with user's learner management system (LMS), content hosting solution, or the user's system of record for compliance training, so the user's learners have one unified system for all learning

> **Project Name:** Threat Modeler (August 2019 to cont.)
> **Client:** Threat Modeler, New Jersey
> **Tool and Environment:** JIRA, Staging Env
> **Roles** – Manual Testing, Automation Testing

Project Details:

- Threat Modeler was established in 2010 in New Jersey, US. It is an automated threat modelling solution that fortifies an enterprise's SDLC by identifying, predicting and defining threats, empowering security
- Threat Modeler provides a holistic view of the entire attack surface, enabling enterprises to minimize their overall risk.
- Threat modelling is a systematic approach by which defenders may understand their system from the perspective and view of probable attackers. If defenders can understand how potential attackers are most likely to see and approach their system, they can prioritize their limited resources accordingly

.

> **Project Name:** BIZNET (Aug 2015 to Feb 2018)
> **Client:** BIZNET, Indonesia
