Derived the Test Scenarios and designing the manual test cases.

Conducted defect review meetings with the Development team.

Involved in developing use cases and Preparing SRS along with Business   Analyst.

Involved in designing   page flows in Integrated Hospital Information System.

Implemented Requirement Traceability Matrix

Projects

1. Prescript

A Windows based software that offers comprehensive solutions to various segments of **Health Care Service**, which provides both clinical and patient care aspects to hospital management.

Role: Worked as QA team member and deployed the application in MIMS hospital, Kozhikode

2.IHISpro(android and ios)
IHIS pro is a mobile application that helps doctor to enter EMR of the patients and it is linked to the HODO EMR web service, so the patient can easily access their medical records and can book their appointments according to the doctor availability.

Role: Worked as a QA team member

3. Jeddah Scan (Pioneer Vision)
Application is advanced radiology center management software. This system introduced to improve quality of radiology center management like Common clinical processes across imaging practices fulfill the requirements to not only produce an interpretation but also to manage results distribution and billing procedures.

Role: **Worked** as QA team Member and deployed the application in Saudi Arabia

4. MOH(Ministry of Health)

A Windows based software that offers comprehensive solutions to various segments of **Health Care Service**, which provides both clinical and patient care aspects to hospital management. Connects various departments like Front desk, Nurse Desk, Case desk, Lab desk, Pharmacy etc even it is in outside hospital surrounding. EMR (Electronic Medical Record) snapshot is one of the attractive features of MOH which

helps the doctor to monitor present condition and history of a patient even it is inpatient or outpatient. APPO is another attractive feature of this software..NET technology is used to build this software which is a very simple and upcoming effective technology in the field.

Role: Worked as QA team Member and deployed the application in Saudi Arabia

Technical Skills

Web Designing: JavaScript, Html, Xml

Testing Tools: QTP, Load Runner, Test Director, Selenium, TFS

Operating Systems: Windows XP/7/8, Fedora, Ubuntu

Awareness**:** Software Testing, Networking, Image Processing, Neural Network

Software awareness: Visual Basic, Matlab, NS2.

ACHIVEMENTS AND EXTRA CIRCULATION
