- Handled key responsibilities within the team with passion to deliver effective results and onshore communication related to daily tasks and queries.
- Good knowledge of Software Testing and SDLC phases

Project Undertaken

1) Project 1: Deloitte Audit

Deloitte performs an audit every year on my client (Raytheon). It is an extensive project which lasts for about 2 months. During this audit, we have to provide data of the employees to Deloitte by creating the queries for each pension benefit that a participant could be entitled to depending on the pension plan the employee decides to take part in.

2) Project 2: Payroll Processing

Payroll Processing is a time-sensitive project with very high client visibility. It is done on a weekly basis. This processing mainly loads the earnings of an employee in DB7 which can be viewed by them on the web. Since I am the primary owner of this processing, I am responsible for carrying out the processing to its entirety and ensure its successful completion.

3) Project 3: RTX Transition changes for Letters

It was a project focusing merger of two of our clients and combining them as one and as a part of this , I worked on the letter module and handled each and every letter changes and tested them and successfully delivered it to the client.
