Work History

Jan 2019 - Jun 2020

Software Developer
One97 Communication Limited (paytm), Noida, UP

Project -INDIAN OIL CORPORATION LTD (IOCL)

Description-This project provides Paytm users to make a digital payment at IOCL kiosks. It allows users to make payment and redeem the royalty points.

Role –

- Building APIs by following the coding standards
- Building appropriate tests and deployment scripts
- Involved in designing features.
- Performed software testing to uncover bugs and troubleshoot issues prior to application launch.

- Collaborated on all stages of systems development lifecycle, from requirement gathering to production releases.
- Created workflow diagrams and Gantt charts to clearly demonstrate processes and timelines.
- Contributed ideas and suggestions in team meetings and delivered updates on deadlines, designs and enhancements.

Project - **PAYTM GATEWAY(WALLET)**

Description –Paytm wallet is a digital payments platform that allows user to transfer cash into the integrated wallet via online banking, debit cards, and credit cards, or even by depositing cash via select banks and partners. Using the money in the Paytm wallet, user can pay for several goods without using cash.

Role –
- Building APIs by following the coding standards
- Building schedulers.
- Revised, modularized and updated old code bases to modern development standards, reducing operating costs and improving functionality.

Mar 2018 - Jan 2019

Data Analyst

Infosys, Vaishali, Ghaziabad, UP

Project: - **TDSCPC GOVT. OF INDIA**

Description - TRACES is the website for TDS reconciliation and correction enabling system. An undertaking of the Income Tax Department, the website enables easy filing of TDS/TCS correction statements by deduction. TDS deduction can register on TRACES and easily file online correction statements.

Role-
- Analyze customer data and use the algorithm to filter the data.
- Monitoring quality of the results in production system by going through various reports and visually validation the results.
- To process the upheld records and clear the pendency for previous days for online correction/form download requests which involves deep analysis and flow understanding.
- Identified and documented detailed business rules and use cases based on requirements analysis.
- Corrected any data entry error to prevent later issues such as duplication or data degradation.
- Developed database objects, including tables, views and materialized views using SQL.
