- **Bachelor of Technology** from **SIET, Greater Noida, UP 201308 (2015-2019)**
- **12th** from **TCS, Varanasi, UP (2013-2015)**

TECHNICAL SKILLS

Web Development	Dot Net, Dot Net Core, Angular, Vue.js , Web API
Programming Languages	HTML5, JavaScript
Database	MS SQL Server, Azure SQL, Azure Synapse
Tools	Visual studio code, Visual studio 19, MS SQL Server 2017, ADF Studio
Reporting Tools	Azure DevOps
Payment Integration	Authorize.net
Source Control Tools	GIT, TFS

PROJECT DETAILS

Project # 1

Roles	Software Engineer
Duration	Nov 2019 to Mar 2020
Technology Used	Dot Net, MS SQL Server, Web API

Project Description:

The aim of the project was to convert Image into Rich text format and to convert Rich Text into Image so that Image can be rendered by iOS Team

Roles and Responsibilities:

- Requirement gathering.
- Get information from client discussion and documentation provided by client.
- Creation of API in order to convert Image into Rich text format and vice versa.
- Customization of API as per iOS team requirement and client's requirement.
- Design of database table as per requirement.
- Demonstration of Project Progress to the client in weekly call.

Project # 2

Roles	Software Engineer
Duration	Mar 2020 to Dec 2020
Technology Used	Dot net, Angular, MS SQL server, JavaScript

Project Description:

Project was related to Logistics in which there was three different application one was for account

creation and role allocation for the client's vendors which was done by client itself.

Second application was where vendors can access and view there queries that any particular

consignment is assigned or not or consignment status.

Third application was about view Images, logs, Account receipt.

Roles and Responsibilities:

- Requirement gathering and task completion.
- Handled client call and demonstrate project progress.
- Customise theme using layout and developed custom modules as per requirements.
- Implemented the functionality and created APIs
- Designed Database tables.
- Created Layout and Themes for Application

Project # 3

Roles	Software Engineer
Duration	Jan 2021 to July 2021
Technology Used	Dot Net Core, Angular, Azure, Authorize.net, Web hooks

Project Description:

   Build POC of Insurance domain for client in order to Process Payment against policy of Policy holder
Through Embedded Iframe and without saving Credit Card/ Bank Details as per
PCI compliance.
Implementation of Web hooks in order to get transaction details from Authorize.net to process further payments after policy holder's approval.

Later in this Project Upgraded whole application from lower Version of angular to Latest Version.

Roles and Responsibilities:

- Requirement gathering and task completion.
- Created POC to Process Payment through Authorize.net
- Integrated Payment gateway for authorise dot net in Vue.js.
- Implement Rest APIs.
- Application Upgradation and Resolved Dependencies issue.
- Do team help resolving issues occurred during development of application
- Attend client status calls to discuss the requirements and to demo completed tasks.

Project # 4

Roles	Senior Software Engineer
Duration	Aug 2021 to till now
Technology Used	Azure Data Lake, Azure SQL, MS SQL, ADF
Team Size	3

Project Description:

   Project is from Mortgage Domain where my role is to develop Store Proc in order to list of loan defects, implementation of incrementally load of all the dbo tables.
CI/CD Pipelines is implemented for each of the servers for deployment; ADF Pipelines is also used for Data Syncing across different Servers.

Roles and Responsibilities:

- Requirement gathering and task completion.
- Store Procedures Development.
- ADF Pipeline Implementation.
- Unit Testing for Store Procedure.
- Optimized Client's code to enhance performance of application.
- Do team help resolving issues occurred during development of application
- Attend client direct and Scrums calls to discuss the requirements and to demo completed tasks.
