Professional Experience

ClockInOut

- Technology used in this project like Core PHP, Laravel, Angular, MySQL, Rest API
- Led a team of 7 and was instrumental in successfully completing "ClockInOut".And also Collaborated with the Marketing head and client from Moon Technolabs company.
- In this project, we manage employee Intime, out time, break taken time, working hours of employees per day or per week.
  Employees can add or edit his/her daily work report in this ClockInOut web app. Also, they can download his/her worksheet.
- In this web app we manage employee leaves they taken by his work period in the company.
- In this app Admin create projects and assign to the employees and employee can add work report with hours for that project.
- So, All projects are managed with proper hours, and we can give project estimates to clients easily.
- Employees can create tickets and assign them to a responsible person for their problems. The assignee person can notify by email.

MyFreelap

- Technology used in this project like Codeigniter, MySQL, Rest API
- Freelap project is base on the Sport(All kinds Of sport). In this project we have created sport related modules like create session, create group etc.. using that module Session Admin or Users can check session history and can join that session. in this project, we have give many option for sport selection related.
- Users can create one session and can share to the multiple users or groups. Users or Group can see all activity of that created session also users can see all type session reports(Export PDF, Export CSV).
- Users can create one group and can add multiple users to in this group and can share session to this group and all group member can see that session activity.

ARA

- Technology used in this project like Laravel, MySQL, Rest API, PayFort Payment Gatway.
- ARA project is based on water supplier system. In this project I have created Admin Panel and Rest API.
- Ara is a simple and easy to use mobile application service to get Ara drinking water delivered at your place by one click.
- ARA Driver app is an app that helps drivers locate, route & navigate orders as fast as possible to clients in a
  state-of-the-art modern easy way.

GLADIATOR

- Technology used in this project like Laravel, MySQL, Rest API.
- Gladiator is sports app for athlete can register with interested sports and find coach, coach can register with multiple sports and find perfect athlete and coach can share best athlete to his provider coach. athlete and coach can chat internally.
