SKILL SET

Technical
⚑ **Languages/DBs : Netezza, Oracle , Teradata, SQL, UNIX Shell Scripting**
⚑ Operating Systems: UNIX, WINDOWS
⚑ Packages : Netezza database, Oracle 9i and 10g, RDBMS, Cognos Reporting
⚑ Tools/Application: Data Stage/IIS (both Server and Parallel edition), Infosphere MDM, Information Analyzer, MKS Code Management Tool, Cognos (basics), Big Data Anaytics (basic)
GENEVA (Rating and Billing Engine), Project Tracking Tool, TOAD, WinCVS, Rational Clear Case and Clear Quest, Knowledge of OLAP etc. Also have exposure of data modeling and ETL Architecture.
⚑
Functional
⚑ Client interaction for requirement analysis and contribute to system study and analysis.
⚑ Design and development of the workflow program and handle various phases of application development.
⚑ System Design.
⚑ Involve in application development and Unit, Integration & System Debugging and troubleshooting of the application.
⚑ Performance tuning of the application, reduction in the number of loops and code optimization.
⚑ Involve in project documentation for each module of the application.
⚑ Having in-depth knowledge and experience of Design, Build and Deployment Phase of SDLC
⚑ Have worked end to end for many modules, staring from Source (Oracle/Siebel/SAP etc.) till reporting with Cognos and extensively worked on ETL DataStage for Data Cleansing, Selection and Transformation
⚑ Oversee smooth implementation and troubleshooting the application and extend post go-live & application maintenance support to the client.

⚔ Have exposure of project management and taking care of modules

ORGANISATIONAL IT EXPERIENCE –11.6 Years

Onsite Exposure: USA, China, Hong Kong, Indonesia

Key Projects handled at IBM:

Title: RSA Insurance
Client: Royal and
Sunalliance, Canada
Duration: Since May'2016
Software: Data Stage (IIS), Infosphere MDM, Teradata,
Oracle , Unix
Roles and Responsibilities:
⚔ Working as ETL Lead/Architect,
⚔ Working with ETL design & architecture documents and also involve in development activities along with guiding team for the same.
Team Size: 5

Title: NewLook Retail
Client: Newlook, UK
Duration: Nov'15 – May'16
Software: Data Stage (IIS), Netezza, Oracle, UNIX
Roles and Responsibilities:
⚔ Working as ETL Lead/Architect,
⚔ Working with ETL design & architecture documents and also involve in development activities along with guiding team for the same. Team Size: 20

Title: Etisalat Emirates CC2
Client: Dubai, UAE
Duration: August'2015 –
Nov'2015
Software: Data Stage (IIS), Netezza, Oracle, UNIX
Roles and Responsibilities:
⚔ Working as ETL Lead/Architect,
⚔ Working with ETL design & architecture documents and also involve in development activities along with guiding team for the same.
Team Size: 4

Title: PT Indosat
Client: Indosat, Jakarta, Indonesia
Indosat is one of the largest telecom service provider in Indonesia.
Duration: 5 months
Software: Data Stage (IIS), Oracle, UNIX
Roles and Responsibilities:
⚔ Working as ETL Lead/Architect,
⚔ Working with ETL design & architecture documents and also involve in development activities along with guiding team for the same.
Team Size: 12
Report to: Account Manager

Johnson Controls is a global diversified technology and industrial leader serving customers in more than 150countries. They create quality products, services and solutions to optimize energy and operational efficiencies of buildings; lead-acid automotive batteries and advanced batteries for hybrid and electric vehicles; and interior systems for automobiles. The current project aims at creating 30 strategic global reports at the AMERICAS level and integrating data in the EDW for USA, Mexico and Brazil Duration: 6.5 months Software:
IIS Data Stage, Citrix,Oracle 10g, UNIX Roles
and Responsibilities:
⚔ Offshore lead, ensured delivery and acted as the point of contact for ETL offshore technical leadership
⚔ Created ETL design documents, architectures design documents of ETL
⚔ Lead the offshore in the ETL development phase for Order and Shipment & Financial Forecasting module

🌲 Coordinated with the business and understood the requirement of the ETL solution
Team Size: 5
Report to: Project Manager

Title:RICOH DWH and TAMS
Client: RICOH EUROPE
Duration: 24 months
Software: IIS Data Stage, Toad, Oracle 10g, UNIX
Role : As a Senior ETL Developer & DataStage Lead for development project and as a BI Consultant for AMS/Support Project
Team Size: 5 for development team, was only person involved for AMS and Support Team
Report to: Project Manager

Key Projects handled at Ericsson:
Title: PROPS-C
Client: Ericsson, USA
PROPSC is project management financial data used for Ericsson.
Duration: 11 months till date
Software: Data Stage (IIS), Big Data, Netezza,
UNIX Roles and Responsibilities:
🌲 Working as ETL Lead/Architect,
🌲 Created ETL design & architecture documents and also involve in development activities along with guiding team for the same.
🌲 Leading and Managing the Project in the ETL development & QA phase
Team Size: 7
Report to: Account Manager

Key Projects handled at Wipro:
Title: AMS (Availability Management System)
Client: TJX Companies, USA
The TJX Companies, Inc. is the leading off-price retailer of apparel and home fashions in the U.S. and worldwide, ranking No. 125 in the most recent Fortune 500 listings. The Marmaxx Group (T.J. Maxx and Marshalls) and HomeGoodsin the U.S. TJX Canada (Winners, HomeSense, and Marshalls); and TJX Europe (T.K. Maxx and HomeSense). In December 2012, TJX acquired Sierra Trading Post, an off-price internetretailer.
The Availability Management System (AMS) is a web based tool used by planning and allocation that assists in the weekly planning and shipping strategy process. This project is an enhancement in AMS to improve access to information used in decision making for anticipating DC production. The enhancement includes more frequent data updates, including dollar information. This provides more accurate visibility to the processing status of a PO, hence, increasing the accuracy of shipping decisions. This also provides information on merchandise availability allowing Planning and Allocation analysts to create Shipping Strategies.
Duration: 9 months
Software: IIS Data Stage, Netezza, UNIX, Cognos, Information Analyzer Roles
and Responsibilities:
🌲 Working as ETL Lead & Onsite Lead, Ensuring delivery and acted as the point of contact for ETL offshore
🌲 Created ETL design & architecture documents and also involve in development activities along with guiding offshore team for the same.
🌲 Leading and Managing the Project in the ETL development & QA phase from Onsite
Team Size: 7
Report to: Account Manager
Title: HRIS (Human Resources Information System)
Client: TJX Companies, USA
The TJX Companies, Inc. is the leading off-price retailer of apparel and home fashions in the U.S. and worldwide, ranking No. 125 in the most recent Fortune 500 listings. The Marmaxx Group (T.J. Maxx and Marshalls) and HomeGoods in the U.S.; TJX Canada (Winners, HomeSense, and Marshalls); and TJX Europe (T.K. Maxx and HomeSense). In December 2012, TJX acquired Sierra Trading Post, an off-price internet retailer.
