PROJECTS HANDLED

Project #1:

Client   : Hexagonit solutions, US.

Project   : Got Incite – Create Online Survey.

Skills   : PHP, MySql, Jquery, Javascript

Brief description of the project:

It is an online survey software and questionnaire tool. The Users can create own survey professionally. It can also check over color themes for your survey report. After creating survey you can collect the response and create an online survey report and with our web based software tool. It can also add their own company logo on the report and save the file in CSV, PDF or in excel format. After creating the survey and checking out the responses, one can analyze the result or response of the third party whether it is satisfactory, good or bad. Also one can see the result and compare with that of their competitors and get a clear picture of their own business. For analysis, you can create pivot tables as well as data filters. In addition, you can perform trend and TURF analysis from within the Question Pro interface well. Data storage is unlimited & user friendly reporting, sending emails, number of SMS to send.

Project #2:

Client   : Hexagonit solutions, US.

Project   : iSignal - Beacons and Food Management System

Skills   : PHP, MySql, HTML, CSS, Jquery, Bootstrap, JSON, Rest API

Brief description of the project:

iSignal Beacons works on IOT technology, where the smartphone communicate with BLE device like Estimote Proximity Beacons. This website is developed by concentrating Hotel both owners and customers. Once the customer entered the hotel, they get the notification of the special offers from the nearest beacons through mobile. Foody iSignal website to get discounts from hotels and restaurants in and around you. Every time you walk in or pick your package, get exclusive and eye catchy discounts from your favorite restaurants.

Project #3:

Client   : Hexagonit solutions, US

Project   : TimePro - Employee Timesheet Management

Skills   : PHP, MySql, HTML, CSS, Jquery, JSON

Brief description of the project:

This project is designed to maintain every employee activity and log for the company. First, the company signs up to the portal after that they can add all employees with their separate login credentials. This website is having different types of logins like super admin, manager, and employee, and also we have given login access based on login type. On this employee portal, they can enter their in and out work time, After a day or week, they can send their timesheet to the supervisor. Once the supervisor approve that details, the company will pay their payment based on their timesheet.

Project #4:

Client	: Hexagonit solutions, US
Project	: Ninja Support - Customer Support System
Skills	: PHP, MySql, HTML, CSS, Jquery, JSON

Brief description of the project:

This Project is a practical and cost-effective customer support system. Organize your support request, prioritize the tickets and assign it to the correct support staff. It is all based on mail. If any of the customers get any issues they can send the issue to the company Email. We can create that mail as a ticket and get full details from the email whether it is office mail/Gmail/outlook etc using API. The company will respond to employees through this portal, rather than the email. Then the admin will assign this ticket to the correct support staff to fix the issues.

Project #5:

Client	: Blomquist Hale
Project	: Project Management System.
Skills	: PHP, MySql, HTML, CSS, Jquery, JSON, Codeigniter Framework

Brief description of the project:

The scope of this project is to develop an application which mitigates the manual work of tenants, by raising the tickets for addressing the issues through this online application. These tickets will be notified to the Vendors(Maintenance) team and appropriate actions will be taken by them.
