## PHP Developer at Zapplocal Technologies, Gurgaon (January 2019 – May 2020) -

1. **Zapplocal.com**
   Zapplocal is a SAAS based platform which helps businesses to grow online.
   This site is a CMS based on CI framework which includes various themes for different type of businesses e.g. doctor theme, school theme, e-commerce theme etc. I have developed full stack software including backend, frontend of the website and also integrated Msg91, Datagen SMS api & Razorpay payment gateway.

   a. **Online.zapplocal.com**
      This site's admin panel is build using CI framwork to manage the content of frontend website.

   b. **\*.zapplocal.com**
      This is the frontend of the website also build using CI framework. Here * means to enter registered website name and their content will be automatically visible on the frontend with their respective theme e.g. dkairconditioning.zapplocal.com, prathapreschool.zapplocal.com primadental.zapplocal.com etc.

2. **Senseentertainments.com**
   Sense Entertainment is one of India's leading live event management company & production house. This site is developed in wordpress to manage the content easily.

3. **Emigrantz.com**
   Emigrantz offers various services, programs like visa, residency etc. in other countries. This site is developed in core php to show their services & programs on digital platform.

## PHP Developer at Zopsoft Technology, Gurgaon (April 2018 – December 2018) -

1. **Travlock.com**
   Travlock is UK based travel company. This site is built to book flights online. The site is developed using php and xml. I have worked on front end design of the website.

2. **Bhaichung Bhutia Football Schools (BBFS)**
   Bhaichung Bhutia Football Schools is an exciting initiative by India's longest serving football captain - Bhaichung Bhutia.
   This site's admin panel or CRM is built to manage the coaches, students, events etc. This site is developed in core php.

## PHP Developer at Eoan Technologies, Gurgaon (April 2017 – March 2018) -

1. **Ajantavalves.com -**

Ajanta Valves is a valve manufacturing company. This site is built to showcase Ajanta's products. The site is developed in wordpress to manage the content easily. I have managed website's content and hosting of the site.
