<u>**Summary:**</u>

- Over 3 years of hands on experience in developing applications in **Java/J2EE** technologies.
- In-depth practical experience working with ER Models, Database design and relational database such as **MySQL**.
- Extensive experience with Object oriented principles.
- Expertise in **Oops concepts**, **multi-threading, String, memory managemen**t and efficient use of **design patterns** concepts.
- Working knowledge in **JSP/SERVLET**.
- Working knowledge in **HTML, CSS, JAVASCRIPT**.
- Knowledge with creating of **RESTful webservices.**
- Knowledge of **Hibernate.**
- Strong problem solving and analytical skills.

<u>**Educational Qualifications:**</u>

- B.E in Computer Science &Engineering, Shivaji University in 2017 with 66.66%

<u>**Technical Skills:**</u>

Programming Skills: JAVA/J2EE, JDBC, JSP,SERVLET, SQL,HTML, CSS and XML
Development Tools: Eclipse
Platforms: Windows 10/8/7
Application Server: Apache Tomcat v8.0
Database: MySQL Server

<u>**Work Experience:**</u>

Globeminds Technologies, Pune

1. Hospital Management
 Support trainee:
 Involved for identifying, fixing, debugging, solving and escalating issue on application as well as monitoring and configuring processes.

 Technologies: Java, MySQL
 Duration: 12 months
 Role & Responsibility:
- Involved for maintaining and support to the application
- handle the queries of modules and database.
- Also involved in unit testing of an application.

2. Genomic Dataset
 Jr. Software Developer
 Minimization of data for Fast and Secure Transfer of Big Genomic Datasets. There are four ways to minimize the data out of which we are using Dictionary method to minimize data.

 Technologies: Java, MySQL, maven
 Duration:10 months

Role & Responsibility:
- Designed and developed the whole system using JSP / SERVLET.
- Designed the MySQL database to handle the large amount of data easily by using relational database schema, table partitioning, etc
