## PROJECTS

Medicine shop management system                                                           Dec. 2015 - Mar. 2016
Role : Designer, Developer
Institute : Asansol girls' college (Major Project)
Team Size : 4
Description : An application that maintains all the information of that medicine shop. This application is easy to use.  So any user can use this medicine shop app. Using this App you can check the stock, selling details, product details etc etc.  We used VB.net and MsAccess to implement this application. As a designer I needed to design the format of medicine shop application to store the all details information about medicine.

Food Testy Online Android Application                                                      Feb. 2019 - Apr. 2019
Role : Designer, Developer
Duration : June, 2018 – July, 2016
Company : Amity University (Major Project)
Team Size : 1
Technology Used : Android Studio, MySQL
Description : It is an android application that helps to order different type of food through online for a particular shop. Using this application we can check  food items of that particular food shop and also you can order your selected food items through online . But I have to implement the online payment process. The future scope is that if we add the customer location  so delivery boy can easily get the customer location and deliver the food of that location without finding  customer location. My role was designer and developer both. As a designer needed to design a user friendly UI using Android Studio.

## ACTIVITIES

**Hobby**
> Listening music
> participated  in ANANDOM blood donate club.

---

**Matainja Technology**                                                                           May 2019 - Current
- Web Developer
- My job is to create new Api using third party Api like (spotrsmonks.com , google news, www.scorebat.com)
- Maintain  GITLAB .
- As per front end requirement I have to modify those Api data.
- After adding those Api I need to test  the site and solve the bugs.
