ABOUT ME

I am a Mobile App Developer in two Platforms (Android / iOS) , currently working at a **Mobmaxime** in Ahmedabad, India. Growing up, I was always interested in creative things, whether it was android, iOS, web, or even games developing. I have been fortunate enough to like work with New Things, ideas, technologies.

Being a creative isn't just what I do–It's what I truly love to do. I currently focused on the Development in Android Wear and Google Glass in my free-time and its effects in to create new ideas.

Currently, I am working on native application since last many years.
And I already started work on **Xamarin** from last 2 years , Its a cross Platform work to create mobile application in (Android + iOS + Windows).

Technologies: Xamarin Studio

2) Project : SHOOTRAC

Details: SHOOTRAC offers a comprehensive suite of software as a service applications that allows organizations of all sizes to better manage their physical assets and mobile workforces. SHOOTRAC is also incredibly simple to implement. Any organization can begin using the SHOOTRAC Asset Relationship Management (ARM) system in only a couple of hours.
SHOOTRAC's patentpending process gives our clients a simple way to capture big data on their customers, assets and workforce and use the information to leverage these resources for maximum efficiency and customer service using a cloudbased, scalable software as a service solution.

Role: Application Engineer.

Technologies: Xamarin Studio, Android Studio

3) Project : Emergency App

Details: 'Emergency +' is a national app developed by Australia's emergency services and their Government and industry partners, helping people to call the right number at the right time, anywhere in Australia. The app uses a mobile phone's GPS functionality so callers can provide emergency calltakers with their location information as determined by their smart phone. 'Emergency+' also

includes SES and Police Assistance Line numbers as options, so nonemergency calls are made to the most appropriate number.

Role: Junior Mobile Application Developer.

Technologies: Xamarin Studio

4) Project : Sharikna

Details : Sharikna means participate in Arabic. Sharikna is an app for all UAE individuals, businesses and visitors, where you can share posts, follow specific topics and receive the latest updates about topics that interest you. What makes Sharikna interesting is that with every participation, you win points and badges! So let the game begin!
